授 業 科 目 の 学 習 教 育 目 標									
キーワード			学習教育目標						
1	要約		文章やデータなどさまざまな情報を適切に判断し取捨選択する力や、筋道立てて考え、効果的に表現する力を伸ばす。課題文型・データ型小論文が書けるようになるために、課題文やデータを正確に読み取り、要約する力を鍛える。また、適切な根拠や具体例を示しながら自分の意見を展開する方法を学び、プレゼンテーション、ディベートなど話す技術へ応用できるようにする。さらに、聞き手の同意や共感を得るために、音声表現だけでなく、資料やスライド、身ぶりや表情といった非音声表現も積極的に工夫する実践的な態度を養う。						
2	課題文型小論文								
3	データ型小論文								
4	レポート								
5	プレゼンテーション								
授業の概要および学習上の助言									
■授業概要 国語表現IA、IBの続きとして、教科書『国語表現』（大修館書店）の下記範囲を学習する。 小論文・レポート入門 会話・議論・発表 なお、この授業ではアクティブラーニングの一環として、ディスカッションや探究活動を行う。									
■学習上の助言 ・課題は必ず提出すること。 ・毎時の小テストは地道に取り組むこと。 ・辞書は必ず用意すること。また、辞書を常に引くように心がけ、知らない言葉を確認し、着実に身につけること。 ・さまざまなジャンルの本を読むよう心がけること。									
【教科書および参考書・リザーブドブック】 教科書：『国語表現』大修館書店 ISBN:978-4-469-62396-3 『国語の常識 plus』明治書院 ISBN:978-4-469-625-23405-7 参考書： リザーブドブック：									
履修に必要な予備知識や技能									
国語表現IA、IBを履修し、日本語の読解力や文章表現力を身につけている。									
No.	教育目標(DP) (記号表記)	学生が達成すべき行動目標							
①	e,f,i	常用漢字の読み書きの習得に積極的に努める。							
②	e,f	課題文を正確に読み取り、的確に要約することができる。							
③	e,f,h	グラフや図表など視覚資料から傾向・特徴を読み取り、論点を把握することができる。							
④	e,f	適切な根拠や具体例を示しながら自分の意見を展開することができる。							
⑤	e,f,d	参考文献表の作成方法や引用方法を理解し、自分の意見と他者の意見を区別して書くことができる。							
⑥	e,f	音声表現・非音声表現を工夫して、効果的なプレゼンテーションを行うことができる。

具体的な達成の目安

理想的な達成レベルの目安	標準的な達成レベルの目安
漢字を常に正確に読み書きできる。 文章の論点や主張を正確に読み取り、常に的確に要約できる。 グラフや図表など視覚資料から、論点を的確に把握することができる。 適切な根拠や具体例を示しながら、自分の意見を展開することができる。 参考文献表の作成方法や引用方法を正しく理解し、他者の意見を有効に引用しながら文章を論理的に展開することができる。 音声表現・非音声表現を工夫して、効果的なプレゼンテーションができる。	漢字の習得に積極的に努めることができる。 文章の論点や主張を読み取り、要約できる。 グラフや図表など視覚資料から、論点を把握することができる。 根拠や具体例を挙げ、自分の意見を書くことができる。 参考文献表の作成方法や引用方法を理解し、自分の意見と他者の意見を区別して書くことができる。 音声表現・非音声表現を意識して、プレゼンテーションができる。

授業明細表

CLIP学習プロセスについて

一般に、授業あるいは課外での学習では：「知識などを取り込む」→「知識などをいろいろな角度から、場合によってはチーム活動として、考え、推論し、創造する」→「修得した内容を表現、発表、伝達する」→「総合的に評価を受ける、Good Work!」：のようなプロセス（一部あるいは全体）を繰り返し行いながら、応用力のある知識やスキルを身につけていくことが重要です。このような学習プロセスを大事に行動ください。※学習課題の時間欄には、指定された学習課題に要する標準的な時間を記載してあります。学修単位科目については、各授業に応じた時間（例えば2単位科目の場合、予習・復習で200分/週）を取るよう努めてください。詳しくは教員の指導に従ってください。

回数 日付	学習内容	授業の運営方法	学習課題(予習・復習)	時間(分)
1 ／	■科目ガイダンス ・科目の目的、内容、評価方法について理解する。	講義と質疑 プリント配布	復習：配布プリントを再読し、学習 教育目標や行動目標を確認する。	30
2 ／	要約 ・要約の方法について理解する。 ・同一文章を異なる文字数で要約する。	小テスト① 要約提出 講義と質疑 プリント配布	予習：小テストのための学習をする。 復習：教科書・ノートを見直す。	30
3 ／	要約 ・過去の大学入学試験問題（要約）に取り組む。	小テスト② 小テスト①返却 要約返却 講義と質疑 プリント配布	予習：小テストのための学習をする。 復習：教科書・ノートを見直す。	30
4 ／	課題文型小論文 ・論点を把握し、課題文を要約する。 ・疑問点を書き出す。	小テスト③ 小テスト②返却 講義と質疑 プリント配布 グループワーク	予習：小テストのための学習をする。 復習：教科書・ノートを見直す。	30
5 ／	課題文型小論文 ・問いに対する自分の意見の根拠を挙げる。 ・反論を想定して展開を工夫する。 ・構成ノートを書く。	小テスト④ 小テスト③返却 構成ノート提出 講義と質疑 プリント配布	予習：構成ノートを作成する。 復習：教科書・ノートを見直す。	30
6 ／	課題文型小論文 ・添削内容を確認し、構成や展開を修正する。 ・清書する。	課題文型小論文提出 小テスト④返却 構成ノート返却 講義と質疑 プリント配布	予習：レポートを推敲する。 復習：清書を見直す。	30
7 ／	課題文型小論文 ・他学生の小論文を読み、相互評価する。	課題文型小論文返却 講義と質疑 プリント配布	予習：レポート②を仕上げる。 復習：相互評価を見直す。	30
8 ／	データ型小論文 ・グラフの種類と特徴を理解する。 ・相関関係と因果関係の違いを理解する。	講義と質疑 プリント配布	予習：データ型小論文について調べる。 復習：教科書・ノートを見直す。	30
9 ／	データ型小論文 ・データを読み取り、論点を把握する。 ・どのような解釈が可能か説明する。	データ型小論文提出 講義と質疑 プリント配布 グループワーク	予習：レポートを仕上げる。 復習：教科書・ノートを見直す。	30
10 ／	データ型小論文 ・他学生の読み取りや解釈を読み、相互評価する。	データ型小論文返却 講義と質疑 プリント配布	予習：教科書・ノートを見直す。 復習：相互評価を見直す。	30

回数 日付	学習内容	授業の運営方法	学習課題(予習・復習)	時間(分)
11 ／	メディアと情報 ・メディアごとに立場や条件が異なり、情報の伝え方が異なることを理解する。 ・引用の方法、参考文献や注の示し方を理解する。	小テスト⑤ 講義と質疑 プリント配布 グループワーク	予習：情報の編集目的や方法について調べる。 復習：教科書・ノートを見直す。	30
12 ／	レポート（探究型小論文）を書く ・レポートの問いを絞る。	小テスト⑥ 小テスト⑤返却 講義と質疑 プリント配布 グループワーク	予習：テーマを考えておく。 復習：問いを見直す。	30
13 ／	レポート（探究型小論文）を書く ・先行研究を調べ、参考文献表に記入する。 ・文章構成・展開を考え、構成ノートを作成する。	レポート提出 小テスト⑥返却 プリント配布	予習：構成ノートを作成する。 復習：添削を見直す。	30
14 ／	プレゼンテーション ・プレゼンテーションの表現要素および表現技術について理解する。 ・プレゼンテーションの構成について理解する。	講義と質疑 プリント配布 グループワーク	予習：プレゼンテーションについて調べる。 復習：教科書・ノートを見直す。	30
15 ／	プレゼンテーション ・プレゼンテーションを行い、質疑応答する。 ・相互評価する。	実技：プレゼンテーション プリント配布 グループワーク アンケート実施	予習：発表の練習をする。 復習：相互評価を見直す。	30

2026 Syllabus

Instructor with "*" means an instructor with company experience

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S General Elective		English Expression II A		1	620600	First	Lecture Class		
Target Grade	Instructor		Office	E-mail Address		Office Hours			
2	TAYLOR, James		Hakusanroku C: 101.201			Monday 16:30-17:30			
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Writing		Students will come to prepared to speak and write in English. To progress in the class students will complete and submit tasks on time. Peer review and feedback are important parts of the writing process, so students will use every opportunity to communicate with classmates, respect others' ideas and opinions. It is crucial to ask classmates or the teacher for help when necessary.						
2	Essays								
3	Genres								
4	Journal								
5	IELTS								
Course Description and Expectations for Students (10.5pt)									
This course will offer group discussion and group work as types of active learning. Students will consider what they learnt in English Expression I A and I B and will expand on their knowledge by continuing to learn about and practice the writing process, including planning and peer review, to write essays. Through the writing process and targeted language activities, students will gain the skills to describe their ideas logically in written English. Short writing tasks will be completed on a weekly basis for homework to give students further opportunities to practice expressing themselves. Students will learn and practice the skills and language to achieve high scores on academic writing tasks.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Ability to communicate in written English. Desire to improve writing skills through responding appropriately to receiving feedback and constructive criticism. Work ethic to revise, edit, and rewrite drafts of an essay.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	b, f	Students will be able to develop sentences and paragraphs in response to issues and themes raised in class.							
②	e	Students will be able to draw on cultural knowledge and personal experience to express themselves.							
③	d, f, g	Students will be able to use planning techniques and peer review to develop their and others' work.							
④	e, f	Students will be able to achieve clarity of thought by identifying the features of various genres of writing.							
⑤	f, g	Students will be able to use rhetorical appeals to express thoughts and opinions and to persuade others.							
⑥	e, f, i	Students will be able to investigate and discuss authors' intentions and meanings in various examples.							
Evaluation Criteria

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students improve their writing drastically, go through the writing process, respond appropriately to feedback, and produce essays of various genres that are logically structured, well argued, and supported by evidence from reliable sources. Students complete and submit all work on time. Students achieve high scores on academic writing tasks.	Students improve their writing to some extent, go through the writing process, respond to some feedback, and produce essays of various genres that are for the most part logically structured, well argued, and supported by evidence from reliable sources. Students achieve reasonable scores on academic writing tasks.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Introduction: Students will read the syllabus. Academic Writing Task 1: Students will review the features and structures of effective Task 1 answers.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
2 /	Academic Writing Task 1: Students will attempt Task 1 under exam conditions.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
3 /	Academic Writing Task 2: Students will review the features and structures of effective Task 2 answers.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
4 /	Academic Writing Task 2: Students will attempt Task 2 under exam conditions.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
5 /	Process Essay 1: Students will review the features and structures of a process paragraph, review their own paragraph, then plan and write a process essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
6 /	Process Essay 2: Students will continue writing their process essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
7 /	Process Essay 3: Students will continue writing their process essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
8 /	Process Essay 4: Students will complete and submit their process essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
9 /	Academic Writing Tasks: Students will review Tasks 1 and 2, and will attempt the tasks under exam conditions.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
10 /	Comparison Essay 1: Students will review the features and structures of a comparison paragraph, review their own paragraph, then plan and write a comparison essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

具体的な達成の目安

理想的な達成レベルの目安	標準的な達成レベルの目安
故事成語や慣用句の意味を理解し、効果的に用いることができる。 比喩、押韻、季語の効果を理解し、効果的に用いることができる。 絵を並べ替えて、起伏のある独創的な物語を書くことができる。 キャラクターマップやストーリーマップを活かし、構成や展開を工夫して独創的な物語を書くことができる。 着眼点、構成、文体、語句などを工夫して、心に響くエッセイを書くことができる。 読書の意義と効用について理解を深め、読書経験を重ねることができる。	故事成語や慣用句の意味を理解することができる。 比喩、押韻、季語の効果を理解し、例文を作ることができる。 絵を並べ替えて、起伏を意識して物語を書くことができる。 キャラクターマップやストーリーマップを用い、構成や展開を意識して物語を書くことができる。 着眼点、構成、文体、語句などを意識して、エッセイを書くことができる。 読書の意義と効用について理解し、読書経験ができる。

授業明細表

CLIP学習プロセスについて

一般に、授業あるいは課外での学習では：「知識などを取り込む」→「知識などをいろいろな角度から、場合によってはチーム活動として、考え、推論し、創造する」→「修得した内容を表現、発表、伝達する」→「総合的に評価を受ける、Good Work!」：のようなプロセス（一部あるいは全体）を繰り返しながら、応用力のある知識やスキルを身につけていくことが重要です。このような学習プロセスを大事に行動ください。
※学習課題の時間欄には、指定された学習課題に要する標準的な時間を記載してあります。学修単位科目については、各授業に応じた時間（例えば2単位科目の場合、予習・復習で200分／週）を取るよう努めてください。詳しくは教員の指導に従ってください。

回数 日付	学習内容	授業の運営方法	学習課題(予習・復習)	時間(分)
1 ／	■科目ガイダンス ・科目の目的、内容、評価方法について理解する。 レトリック ・比喩の種類と効果について理解する。 ・比喩を用いた文章を書き、批評し合う。	講義と質疑 プリント配布	復習：配布プリントを再読し、学習教育目標や行動目標を確認する。	30
2 ／	レトリック ・押韻や類音の仕組みと効果について理解する。 ・自分の好きな歌の歌詞について、どのような技法が用いられているかを説明する。	小テスト① ポートフォリオ 講義と質疑 プリント配布 グループワーク	予習：小テストのための学習をする。 復習：教科書・ノートを見直す。	30
3 ／	アクロスティック・アナグラム ・言葉遊びの体験を通して、言語表現の多様な側面を理解し、その楽しさを知る。	小テスト② ポートフォリオ 講義と質疑 プリント配布 グループワーク 小テスト①返却	予習：小テストのための学習をする。 復習：教科書・ノートを見直す。	30
4 ／	短歌と俳句 ・短歌、俳句という伝統的な文芸ジャンルについて理解を深め、実際に創作する。 ・短冊を作成し、相互評価する。	小テスト③ 講義と質疑 プリント配布 グループワーク 小テスト②返却	予習：小テストのための学習をする。 復習：教科書・ノートを見直す。	30
5 ／	物語の鑑賞と批評 ・作品を読み、感想を伝え合う。 ・物語を面白くするためにどのような工夫があるか、話し合う。	講義と質疑 プリント配布 グループワーク 小テスト③返却	予習：教科書・ノートを見直す。 復習：相互評価を見直す。	30
6 ／	ファミリーロマンス ・仮想の状況や人物設定をもとに想像を広げ、物語を創作する。	小テスト④ レポート提出 講義と質疑 プリント配布 グループワーク	予習：小テストのための学習をする。 復習：作品を仕上げる。	30
7 ／	絵から物語を作る ・発端、展開、クライマックス、結末の展開を意識して、4枚の絵から短い物語を作る。	講義と質疑 プリント配布 グループワーク	予習：作品を読み直す。 復習：相互評価を見直す。	30
8 ／	五感を用いた描写文 ・比喩やオノマトペを用いて描写文を書く。	小テスト⑤ レポート提出 講義と質疑 プリント配布 グループワーク 小テスト④返却	予習：物語のテーマを決める。 復習：ノート・教科書を見直す。	30
9 ／	物語の設計図 ・ストーリーマップとキャラクターマップを利用して物語の設計図を作る。	レポート提出 講義と質疑 プリント配布 グループワーク 小テスト⑤返却	予習：ストーリーマップを読み直す。 復習：作品を仕上げる。	30
10 ／	物語の創作 ・設計図に沿って物語を書く。	小テスト⑥ 講義と質疑 プリント配布 グループワーク	予習：作品を添削する。 復習：作品を仕上げる。	30

授業明細表

C L I P 学習プロセスについて

一般に、授業あるいは課外での学習では：「知識などを取り込む」→「知識などをいろいろな角度から、場合によってはチーム活動として、考え、推論し、創造する」→「修得した内容を表現、発表、伝達する」→「総合的に評価を受ける、Good Work!」：のようなプロセス（一部あるいは全体）を繰り返し行いながら、応用力のある知識やスキルを身につけていくことが重要です。このような学習プロセスを大事に行動ください。
※学習課題の時間欄には、指定された学習課題に要する標準的な時間を記載してあります。学修単位科目については、各授業に応じた時間（例えば2単位科目の場合、予習・復習で200分／週）を取るよう努めてください。詳しくは教員の指導に従ってください。

回数 日付	学習内容	授業の運営方法	学習課題(予習・復習)	時間(分)
11 ／	物語の鑑賞と批評 ・ 作品を朗読し、感想を伝え合う。	レポート提出 講義と質疑 プリント配布 グループワーク 小テスト⑥返却	予習： 作品を読み直す。 復習： 相互評価を見直す。	30
12 ／	ビブリオバトル ・ 発表内容の主題を決め、構成や展開を考える。	小テスト⑦ 講義と質疑 プリント配布 グループワーク	予習： 小テストのための学習をする。 復習： 構成ノートを見直す。	30
13 ／	ビブリオバトル ・ 身ぶりや手ぶりや表情なども活用し、本の魅力を表現する。 ・ 発表を聞いて質問したり、感想を伝えたりする。	成果発表 講義と質疑 プリント配布 グループワーク 小テスト⑦返却	予習： 発表の練習をする。 復習： 相互評価を見直す。	30
14 ／	エッセイ ・ 優れたエッセイを観賞し、視点や描写の面白さを味わう。 ・ 書き出しや結びの工夫、レトリックの活用に挑戦して、実際にエッセイを書く。	レポート提出 講義と質疑 プリント配布 グループワーク	予習： エッセイのテーマを決める。 復習： エッセイを仕上げる。	30
15 ／	エッセイ ・ 作品を読み合い、相互評価する。 ・ ふりかえりをする。	 講義と質疑 プリント配布 グループワーク	予習： エッセイを見直す。 復習： 相互評価を見直す。	30

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Writing		Students will come to prepared to speak and write in English. To progress in the class students will complete and submit tasks on time. Peer review and feedback are important parts of the writing process, so students will use every opportunity to communicate with classmates, respect others' ideas and opinions. It is crucial to ask classmates or the teacher for help when necessary.						
2	Essays								
3	Genres								
4	Journal								
5	IELTS								
Course Description and Expectations for Students (10.5pt)									
This course will offer group discussion and group work as types of active learning. Students will consider what they learnt in English Expression I A, I B, and II A and will expand on their knowledge by continuing to learn about and practice the writing process, including planning and peer review, to write essays. Through the writing process and targeted language activities, students will gain the skills to describe their ideas logically in written English. Short writing tasks will be completed on a weekly basis for homework to give students further opportunities to practice expressing themselves. Students will learn and practice the skills and language to achieve high scores on academic writing tasks									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Ability to communicate in written English. Desire to improve writing skills through responding appropriately to receiving feedback and constructive criticism. Work ethic to revise, edit, and rewrite drafts of an essay.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	b, f	Students will be able to develop sentences and paragraphs in response to issues and themes raised in class.							
②	e	Students will be able to draw on cultural knowledge and personal experience to express themselves.							
③	d, f, g	Students will be able to use planning techniques and peer review to develop their and others' work.							
④	e, f	Students will be able to achieve clarity of thought by identifying the features of various genres of writing.							
⑤	f, g	Students will be able to use rhetorical appeals to express thoughts and opinions and to persuade others.							
⑥	e, f, i	Students will be able to investigate and discuss authors' intentions and meanings in various examples.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students improve their writing drastically, go through the writing process, respond appropriately to feedback, and produce essays of various genres that are logically structured, well argued, and supported by evidence from reliable sources. Students complete and submit all work on time. Students achieve high scores on academic writing tasks.	Students improve their writing to some extent, go through the writing process, respond to some feedback, and produce essays of various genres that are for the most part logically structured, well argued, and supported by evidence from reliable sources. Students achieve reasonable scores on academic writing tasks.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Introduction: Students will read the syllabus. Academic Writing Task 1: Students will review the features and structures of effective Task 1 answers.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
2 /	Academic Writing Task 1: Students will review the features and structures of effective Task 1 answers.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
3 /	Academic Writing Task 1: Students will attempt Task 1 under exam conditions.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
4 /	Academic Writing Task 2: Students will review the features and structures of effective Task 2 answers.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
5 /	Academic Writing Task 2: Students will attempt Task 2 under exam conditions.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
6 /	Problem-Solution Essay 1: Students will review the features and structures of a problem-solution paragraph, review their own paragraph, then plan and write a problem-solution essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
7 /	Problem-Solution Essay 2: Students will continue writing their problem-solution essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
8 /	Problem-solution Essay 3: Students will continue writing their problem-solution essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
9 /	Problem-solution Essay 4: Students will complete and submit their problem-solution essay.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30
10 /	Academic Writing Tasks 1 and 2: Students will review Tasks 1 and 2, and will attempt the tasks under exam conditions.	Worksheets, writing, brainstorming, discussion, peer review; individual, pair, and group work	Journal	30

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) 2	STEVENSON, Ian		Hakusanroku C. 101-201			Monday 16:30-17:30			
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Listening		Students will develop oral communication abilities for classes taught in academic English and to be able to function socially in an English-speaking environment. Students will be able to talk about things they like/dislike and their hobbies; describe people, things, events, and places using a variety of vocabulary and grammatical structures. Also, students will improve their understanding of topics and vocabulary used in their classes.						
2	Speaking								
3	Communication								
4	Study skills								
5	Presentation skills								
Course Description and Expectations for Students (10.5pt)									
This course will offer group work and discussion, problem solving, discovery and experiential learning as types of active learning. This course emphasizes the use of basic English language for oral communication. Its main purpose is for students to be able exercise literacy skills including, speaking and listening and notetaking for learning in their academic classes. Students will also be able to interact with others using English. This course will be taught through the first 3 units of a textbook.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: <i>Perspectives 4: National Geographic Learning</i> by (Eds). Amanda Jefferies, Lewis Lansford, Daniel Barber, (National Geographic Learning) 2018. ISBN: 978-1-337-27715-0.									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Basic English listening and speaking ability.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	f	Students will be able to greet and introduce themselves to new acquaintances and talk about emotions.							
②	f	Students will be able to discuss and give opinions about hobbies, sports, and travel.							
③	d, h	Students will be able to discuss and describe food, photos, work, shopping, and the human body.							
④	f, i	Students will be able to set goals, make agree and disagree statements, and ask questions.							
⑤	g, f, i	Students will be able to discuss past events and ask for, and make recommendations.							
⑥	d, f	Students will be able to discuss time, explain causes, and give reasons.

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Listening		Students will develop oral communication abilities for classes taught in academic English and to be able to function socially in an English-speaking environment. Students will be able to talk about things they like/dislike and their hobbies; describe people, things, events, and places using a variety of vocabulary and grammatical structures. Also, students will improve their understanding of topics and vocabulary used in their classes.						
2	Speaking								
3	Communication								
4	Study skills								
5	Presentation skills								
Course Description and Expectations for Students (10.5pt)									
This course will offer group work and discussion, problem solving, discovery and experiential learning as types of active learning. This course emphasizes the use of basic English language for oral communication. Its main purpose is for students to be able exercise literacy skills including, speaking and listening and notetaking for learning in their academic classes. Students will also be able to interact with others using English. This course will be taught through the first 3 units of a textbook.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: <i>Perspectives 4: National Geographic Learning</i> by (Eds). Amanda Jefferies, Lewis Lansford, Daniel Barber, (National Geographic Learning) 2018. ISBN: 978-1-337-27715-0.									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Basic English listening and speaking ability.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	f	Students will be able to greet and introduce themselves to new acquaintances and talk about emotions.							
②	f	Students will be able to discuss and give opinions about hobbies, sports, and travel.							
③	d, h	Students will be able to discuss and describe food, photos, work, shopping, and the human body.							
④	f, i	Students will be able to set goals, make agree and disagree statements, and ask questions.							
⑤	g, f, i	Students will be able to discuss past events and ask for, and make recommendations.							
⑥	d, f	Students will be able to discuss time, explain causes, and give reasons.

1	Practical English proficiency		Participation in classes and extracurricular activities abroad is designed to cultivate practical English proficiency applicable across diverse facets of daily living. Moreover, through engagement with local inhabitants and international peers from diverse backgrounds, participants are afforded opportunities for cultural exchange, fostering a global perspective and refining interpersonal communication competencies.						
2	Daily living								
3	Cultural exchange								
4	Global perspective								
5	Interpersonal communication								
Course Description and Expectations for Students (10.5pt)									
Experiential Learning Maximize the benefits of your study abroad experience by developing the confidence to communicate effectively in both spoken and written English. This program is particularly suited for students seeking to engage in academic language studies.									
Immersion Lessons General language lessons focus on reinforcing grammar and expanding vocabulary through an integrated approach combining digital tools and interactive classroom activities. Additionally, project-based sessions allow you to enhance your learning and communication skills through hands-on, interest-driven activities tailored to your personal goals.									
This course is conducted through EF(Education First). There are subjects like General Language and SPIN, and in the General course, there are classes for 17 hours per week. Extracurricular activities are also added. The requirement for earning credits is to receive a completion certificate from the EF program.									
Required Materials (textbooks, reference books, reserved books) (10.5pt) Textbooks: Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
The participation requirement for this course is that there are no unearned credits for subjects in the first year of study. Students must have passed all courses in the first year of study.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	i	Students will be able to improve their English communication skills							
②	e	Students will be able to deepen their cultural understanding							
③	i	Students will be able to pursue academic achievements							
④	d	Students will be able to build an international network							
⑤	c	Students will be able to enhance their personal growth and self-expression skills							
⑥	g	Students will be able to acquire problem-solving skills in cross-cultural contexts

具体的な達成の目安

理想的な達成レベルの目安	標準的な達成レベルの目安
白山地域の持つ歴史や文化の特色を理解し、共有することができる 白山地域の自然環境や地域社会に関心を持ち現状を理解することができる 白山地域の事象から日本の歴史・文化を考え理解する事ができる 地域社会の持つ問題点を正確に捉えることができる 地域社会の持つ問題点を解決する方法を考える事ができる 白山地域の学習を通じて、自らの行動の礎となる理念を養うことができる	白山地域の持つ歴史や文化の特色に触れ学ばせていただく。 白山地域の自然環境や地域社会と出会い現状と向き合う。 白山地域の深い歴史文化の一端に触れさせてもらう。 地域社会の持つ問題点の一部を教示していただく。 地域社会の持つ問題点の一部に真摯に取り組む姿勢を持つ。 白山地域の学習を通じて、困難な問題に取り組む心を養う。

授業明細表

C L I P 学習プロセスについて

一般に、授業あるいは課外での学習では：「知識などを取り込む」→「知識などをいろいろな角度から、場合によってはチーム活動として、考え、推論し、創造する」→「修得した内容を表現、発表、伝達する」→「総合的に評価を受ける、Good Work!」：のようなプロセス（一部あるいは全体）を繰り返し行いながら、応用力のある知識やスキルを身につけていくことが重要です。このような学習プロセスを大事に行動ください。
 ※学習課題の時間欄には、指定された学習課題に要する標準的な時間を記載してあります。学修単位科目については、各授業に応じた時間（例えば2単位科目の場合、予習・復習で200分／週）を取るよう努めてください。詳しくは教員の指導に従ってください。

回数 日付	学習内容	授業の運営方法	学習課題(予習・復習)	時間(分)
1 ／	白山地域の位置づけ：白山地域の地理的・歴史的な位置づけを理解する。 学生達が生活する白山地域の地形、自然を学ぶことにより、地域社会、自然環境の興味関心を高めるとともに、 地域や自然を敬う気持ちを涵養する	白山地域の地理的・歴史的な位置づけを講義する	白山地域の地理的・歴史的な位置づけを調べる 授業内容を確認する	30 15
2 ／	白山地域の自然と環境① 白山地域の自然環境の特色を理解し、その地形が人々の生活にどのような影響を与えたか理解する。また資源を含めたその潜在的可能性について考える	白山地域の地形・資源について講義する 課題①を配布する	白山地域の地形を調べる。 授業内容を確認する	30 15
3 ／	白山地域の自然と環境② 白山地域の自然環境の特色を理解し、国内的・国際的観点から自然環境保護問題について考える	白山の動植物と自然環境保護の取り組みについて講義する 課題①を提出する	白山の動植物について調べる 授業内容を確認する	30 15
4 ／	白山地域の信仰① 白山地域を通じて日本の信仰を理解する 白山地域での信仰の在り方を学び、地域の宗教や信仰の多様性や独自性を知る。 日本の「中世」と山岳信仰を通して「日本人の宗教観」を考え、諸外国と比較する。	白山の信仰について講義する	白山信仰について調べる 授業内容を確認する	30 15
5 ／	白山地域の信仰② 白山山岳信仰と他の地域(国内・海外)における山岳信仰を比較する	白山と他の地域の信仰について講義する 課題②を配布する	白山信仰と他の地域の山岳信仰を調べる 授業内容を確認する。	30 15
6 ／	白山地域の生活・文化：白山地域の人々の生活や文化を理解する 山岳部での人々の生活を通して日本の「古代」を考え、その現代的意義について考察する。	白山地域の人々の生活や文化について講義する 課題②を提出する	白山地域の人々の生活や文化を調べる。 授業内容を確認する	30 15
7 ／	中間・発表 白山地域の持つ問題点 白山地域の持つ問題点をグループ討議で明らかにする	白山地域を総合的に学習した上で、グループ討議により地域の持つ問題点及び解決策を探る。	各自で問題点を考える 発表の準備をする	60 45
8 ／	白山地域から見る日本の歴史① 白山地域から日本の戦国社会を考える 白山地域と日本全体の歴史を比較しながら学ぶことにより、地域の事象を広い視点で捉える方法を学ぶ。また、場所や時代の違いによる、多様な価値観や社会の変遷を知る	日本の戦国社会について講義する。 課題③を配布する 課題③を提出する	戦国日本について調べる 授業内容を確認する	30 15
9 ／	白山地域から見る日本の歴史② 白山地域から日本の近世社会を考える 白山と城下町・金沢の成立とその重要性について 諸外国における城を中心とする社会を比較する	日本の近世社会について講義する 課題④を配布する	近世の日本について調べる 授業内容を確認する	30 15
10 ／	白山地域から見る日本の歴史③ 白山地域から日本の近・現代社会を考える 非西洋社会における近代化の諸課題を理解する。	日本の近・現代社会について講義する 課題④を提出する	近現代の日本について調べる 授業内容を確認する	30 15

Instructor with “*” means an instructor with company experience

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S General Elective		History and Culture II (English)		1	623800	First	Lecture Class		
Target Grade	Instructor		Office	E-mail Address			Office Hours		
2	UEDA, Kiyoshi		Hakusanroku.C 101.201				Monday and Thursday 16:30-17:30		
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Hakusan Region		This course guides students in exploring the history/culture of Hakusan region and Japanese history/culture via regional phenomena. It leads them to develop an interest in the natural environment and local communities to accurately assess their current circumstances and issues in hope of suggesting solutions. Students will also learn to nurture a set of principles as a foundation for their actions by studying the region.						
2	History and Culture								
3	Nature and Environment								
4	Locality and Internationality								
5	Natural Disaster								
Course Description and Expectations for Students (10.5pt)									
Local communities consist of a number of components. This course will guide students in learning basic skills to cooperate with the various local communities of the Hakusan region by comprehensively exploring the history, culture, religion, livelihood, industry, geography, and natural environment of Mt. Hakusan where they live and learn. The course will also nurture a sense of mission in finding solutions for social issues as students reach out to diverse communities in the region.									
Students will independently work on five assignments, preparing themselves for the final exam according to basic knowledge they acquire from these assignments and lectures. Two presentations will take place in class; students are expected to take the initiative in selecting topics and preparing (including research) for them.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: Handout									
Reference books:									
Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Ability to read and write English language (at the high-school level)									
History and Culture IA (English) and History and Culture IB (English)									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	b, e	Students will understand the characteristics of the history/culture of Hakusan region and share them.							
②	b, e	Students will develop an interest in the natural environment and local communities of Hakusan region, thus learning to understand their present circumstances.							
③	b, e	Students will be able to think about/understand Japanese history/culture via the phenomena of Hakusan region.							
④	a, b, e, g, h	Students will be able to grasp issues of the local communities accurately and to develop solutions to the problems of local communities.							
⑤	b, c, e, i	Students will nurture a set of principles as a foundation for their actions by studying Hakusan region.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students can understand the characteristics of the history/culture of Hakusan region and share them; • show an interest in the natural environment and local communities of Hakusan region, thus understanding their present circumstances; • think about/understand Japanese history/culture via the phenomena of Hakusan region; • grasp issues of local communities; • develop solutions to the problems of local communities; • nurture a set of principles as a foundation for their actions by studying Hakusan region.	Students can learn the characteristics of the history/culture of Hakusan region by being exposed to them; • encounter the natural environment and local communities of Hakusan region and face present circumstances; • experience a part of the profound history of Hakusan region; • seek guidance in identifying some of the issues of local communities; • work on some of the issues with which local communities struggle; • nurture their hearts (kokoro) to challenge difficult problems through the study of Hakusan region.

Course Schedule

* The standard time required for the specified assignment is provided in the "Time" column of the assignments. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Geographical/historical positioning of Hakusan region, explaining the geographical and historical location. Students will develop an interest in the natural environment and a sense of respect for Hakusan region by learning about the geography and history of the region where they reside.	Lecture on the geographical and historical location of Hakusan region.	Study the geographical and historical location of Hakusan region. Review course content.	30 15
2 /	Nature and environment of Hakusan region. ① Students will understand particularities of the natural environment of Hakusan region and how its landscape affected people's livelihood. They will also consider its potential, including resources.	Lecture on the geography and resources of Hakusan region. Distribute assignment ①	Study the geography of Hakusan region. Review course content.	30 15
3 /	Nature and environment of Hakusan region. ② Students will understand particularities of the natural environment of Hakusan region and consider the issue of preserving the natural environment from domestic and international perspectives.	Lecture on plants and animals in Hakusan region and preservation of natural environment. Submit assignment ①	Study plants and animals in Hakusan region. Review course content.	30 15
4 /	Worship in Hakusan region. ① Students will study modes of worship in Hakusan region and understand the diversity and characteristics of religion/worship in the region. Students will understand "Japanese attitudes towards religion" through Japan's medieval period and mountain worship, comparing them with those of various countries.	Lecture on Hakusan worship.	Study Hakusan worship and "Japanese attitudes towards religion." Review course content.	30 15
5 /	Worship in Hakusan region. ② Students will understand Japanese religion by comparing Hakusan mountain worship with mountain worship in various regions (domestic and overseas).	Lecture comparing the Hakusan worship with those of other areas. Distribute assignment ②	Study Hakusan worship with mountain worship in various regions both domestic and overseas. Review course content.	30 15
6 /	Livelihood and culture of Hakusan region. Students will think about Japan's "ancient" (kodai) through examination of the livelihood of people in its mountainous areas, reflecting on its contemporary implications.	Lecture on the livelihood and culture of Hakusan region. Submit assignment ②	Study the cultural heritage of Hakusan region. Review course content.	30 15
7 /	Presentation: Regional issues in Hakusan. Highlight the issues faced by Hakusan region and develop solutions through group discussion.	Explore a solution for the issues faced by Hakusan region through discussion. Distribute assignment ③	Examine regional issues. Prepare presentations. Summarize the issues through group discussion.	60 45
8 /	Japanese history from the standpoint of Hakusan region. ① Students will learn how to put the local phenomena of Hakusan region into a broader perspective. They will study the diversification of value systems and social transformations in different locations and time-periods. Students will understand Sengoku society of Japan through the history of Hakusan region.	Lecture on Sengoku society in Japan. Submit assignment ③	Study Sengoku society of Japan. Review course content.	30 15
9 /	Japanese history from the standpoint of Hakusan region. Students will understand early modern society of Japan through the history of Hakusan region, including Hakusan and its significance to the establishment of Kanazawa as a castle town. They will compare it with societies revolving around castles in various countries overseas.	Lecture on early modern society of Japan. Distribute assignment④	Study early modern Japan. Review course content.	30 15
10 /	Japanese history from the standpoint of Hakusan region. Students will understand modern/contemporary society of Japan through the history of Hakusan region and various issues of modernization in non-Western societies.	Lecture on modern/contemporary society of Japan. Submit assignment ④	Examine modern/contemporary Japan. Review course content.	30 15

Course Schedule

* The standard time required for the specified assignment is provided in the "Time" column of the assignments. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	Industry in Hakusan region. Students will understand local industries of Hakusan region from an historical point of view. They will learn the issues and understand the cultural diversity of Hakusan region by studying its industry, livelihood, and culture.	Lecture on local industries of Hakusan region.	Study industries in the Hakusan region. Review course content.	30 15
12 /	Natural disasters in Ishikawa prefecture: flood damage and the Noto Great Earthquake of 2024.	Lecture on flood damage and the Noto Great Earthquake. Distribute assignment⑤	Study flood damage and the Noto Great Earthquake. Review course content.	30 15
13 /	Reconstruction of Ishikawa prefecture after the earthquake.	Lecture on disaster-stricken areas. Distribute assignment⑤	Study the reconstruction. Review course content.	30 15
14 /	Predicting futures of Japan and the world by examining particularities and universalities of various issues the Hakusan region is facing.	Lecture on various issues Japan and international communities will face in the future through the current conditions of this region.	Examine Japan and international communities and today and in the future. Review course content	30 15
15 /	Presentation: Regional issues and improvement plans. Students will make a presentation on an issue (or issues) and offer a solution.	Present a solution and assess the content of others' presentations.	Each student explores a solution in a presentation to the class. Assess the content of others' presentations critically.	60 45
16 /	Final exam	Evaluate students' overall understanding of the subject.	Study overall course content. Review the content of the exam.	50 10
17 /	Self-check

授 業 科 目 の 学 習 教 育 目 標									
キーワード			学習教育目標						
1	近現代史		世界の色々な地域における諸事象を地理的かつ歴史的観点からとらえることによって学生にとっての「今」をより理解できる「物の見方」を養ってゆく。将来日本や海外で活動するために諸地域に関する基礎知識を習得するとともに、これらの地域と日本の歴史的関わりについても学んでゆく。						
2	国際関係・国際情勢								
3	地理								
4	紛争								
5	平和								
授業の概要および学習上の助言									
この授業では「現在」の出来事の成り立ちや原因を究明し理解するため「過去」にさかのぼり考察する。同時に「現在」と「過去」をより理解するために世界各地の地理的条件に関する基本知識を身につけてゆく。またこれらの地理的条件から「人間はなぜ歴史から学ばず同じこと（成功と失敗）を繰り返すのか？」という大きな問いにも考えをめぐらしてゆく。これによって現在の国際関係を動かす力学の一端に触れてゆく。学生には貴重な情報を提供する資料としての地図を「読む」ことを始め、同時に国内外のメディア報道から世界各地の情勢を知るなかで、根拠が示された歴史書を紐解くことが日々の習慣となるように努力を始めてほしい。									
学生は自主的に五つの課題に取り組み、この基礎知識をもとに中間テストと期末試験に備えてもらいます。また、クラス内の発表があるので教員の指示に従ってテーマの選定と発表に向けての準備（リサーチを含む）を主体的に行ってもらいます。この授業では国語（日本語）で世界の地政学を学ぶので、国語での読み書きにしっかりと向き合い、そこから得た確かな知識を土台に国際的観点から世界と日本を考える姿勢を身に付けてください。									
【教科書および参考書・リザーブドブック】 教科書：配布プリント 参考書： リザーブドブック：

2	UEDA, Kiyoshi		Hakusanroku 101.201				Mondays /Thursday 16:30-17:30	
Course Objectives								
Keywords (10.5pt)			Learning Objectives (10.5pt)					
1	Modern/Contemporary History		This course is designed to help students develop a way of looking at things “now” by grasping various phenomena occurring in various regions of the world from both geographical and historical perspectives. To be able to perform in Japan, as well as abroad in the future, students will acquire basic knowledge on various regions and study Japan’s historical involvement in those regions.					
2	International Relations/Affairs							
3	Geography							
4	Conflict							
5	Peace							
Course Description and Expectations for Students (10.5pt)								
This course was designed to inquire into the origins and development of present events by tracing their past. To understand “present” and “past,” students will also obtain basic knowledge about geographical conditions of various parts of the world. Based on those geographical conditions, the course will consider broader questions: Why do humans not learn from history? Why do they repeat the same things, both success and failure? By so doing, students will become familiar with some aspects of dynamics mobilizing international relations today. Students will be encouraged to start “reading” a map as a reference providing invaluable information. Students will become familiar with history, while continually updating their knowledge about current affairs in various areas of the world.								
Students will independently work on five assignments, preparing themselves for a mid-term test and final exam according to basic knowledge they acquire from these assignments and lectures. Also, one presentation will take place in class; students are expected to take the initiative in selecting a topic and preparing (including research) for it.								
Required Materials (textbooks, reference books, reserved books) (10.5pt)								
Textbooks:								
Reference books:								
Reserved books:								
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)								
Ability to read and write English language (at the high-school level)								
History and Culture IA (English) and History and Culture IB (English)								
History and Culture IIA (English)								
No.	Program Objectives	Target Abilities for Students (9pt)						
①	b,e	Students will be able to explain international affairs of East Asia from historical and geographical perspectives.						
②	b,c	Students will be able to understand India and the Middle East explain their roles in the international community in the future from historical and geographical perspectives.						
③	a,b,e	Students will be able to understand the former British Empire and its legacies as the foundation of the international community today from historical and geographical perspectives.						
④	a,b,g,h	Students will be able to understand Russia and its neighboring countries from historical and geographical perspectives.						
⑤	e,c,e,i	Students will be able to explain the North Pole from historical and geographical perspectives and understand its future impact on the international community.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students will be able to explain the international affairs of East Asia from both historical and geographical perspectives. Students will be able to understand India and explain its role in the international community in future from both historical and geographical perspectives. Students will be able to understand the Middle East and explain its various problems that continue today from both historical and geographical perspectives. Students will be able to understand the former British Empire and its legacies as the foundation of the international community today from both historical and geographical perspectives. Students will be able to understand Russia and its neighboring countries from both historical and geographical perspectives. Students will explain the North Pole from both historical and geographical perspectives and its impacts on the international community in future.	Students will learn basic knowledge about the history of international affairs and geographical conditions in East Asia. Students will learn basic knowledge about the history behind the formation of India and its geographical conditions. Students will learn basic knowledge about the history of the Middle East and its geographical conditions Students will learn basic knowledge about the history of the former British Empire and its geographical conditions. Students will learn basic knowledge about the history of Russia and its neighboring countries and their geographical conditions. Students will learn basic knowledge about the history of the North Pole and its geographical conditions.

Course Schedule

* The standard time required for the specified assignment is provided in the "Time" column of the assignments. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Introduction	Lecture on geography, history, and international relations.	Review course content.	30 10
2 /	China	Lecture on various issues China faces. Distribute Assignment ①	Review course content.	30 10
3 /	The Korean Peninsula	Lecture on various issues surrounding the Korean Peninsula. Submit Assignment ①	Review course content.	30 10
4 /	Southeast Asia	Lecture on various issues in Southeast Asia. Distribute Assignment ②	Review course content.	30 10
5 /	South Asia: India as its center	Lecture on the significance of India and its various issues. Submit Assignment ②	Review course content	30 10
6 /	Middle East	Lecture on the importance of the Middle East and its various issues.	Review course content.	30 10
7 /	African Continent	Lecture on the history of the African Continent and its various challenges. Distribute Assignment ③	Review course content.	30 10
8 /	Legacies of colonial policies: the former British Empire	Lecture on the legacies of the former British Empire by selecting examples of a few countries. Submit Assignment ③	Review course content.	30 10
9 /	Russia and Eastern Europe (including the Balkan Peninsula) Mid-term test (60 minutes)	Lecture on Russia's external policies and its relations with its neighboring countries.	Study course content. Review the contents of the test and the results.	60 10
10 /	The North Pole	Lecture on various issues surrounding the North Pole. Distribute Assignment ④	Review course content.	30 10

Course Schedule

* The standard time required for the specified assignment is provided in the "Time" column of the assignments. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	North and South Americas	Lecture on various issues of the two continents. Submit Assignment ④	Review course content.	30 10
12 /	Central Asia	Lecture on various issues surrounding Central Asia.	Review course content.	30 10
13 /	The Pacific Islands	Lecture on various issues surrounding the Pacific islands. Distribute Assignment ⑤	Review course content.	30 10
14 /	“Space”	Lecture on ulterior motives of Great Powers over the area called “space”. Submit Assignment ⑤	Review course content.	30 10
15 /	Presentation	Present a topic of the student’s choice.	Prepare for presentation. Evaluate one’s presentation and others	60 45
16 /	Final Exam	Final exam (50 minutes)	Study overall course content. Review the content of the exam and the results.	50 10
17 /	Self-check			

2026 Syllabus

Instructor with “*” means an instructor with company experience

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S General Required		Calculus A		2	611200	First	Lecture Class		
Target Grade	Instructor		Office	E-mail Address			Office Hours

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Limits		Students will be able to master the concept of a limit, show how a limit help us define the derivative, consider different techniques of differentiation, know how to use derivatives to sketch the graphs of numerous functions, learn how to apply the concept of derivatives to real-world problems, and how sequences can be useful to convey numbers.						
2	Continuity								
3	Derivatives								
4	Graphs								
5	Sequences								
Course Description and Expectations for Students (10.5pt)									
In this course, we will learn how the study of calculus came to be and why calculus is important for many different fields in science and technology. The course will start with the idea of limits and how we use limits to understand how functions behave at certain points and at infinity. We will then learn the notion of continuity and how limits and continuity help us understand the notion of a derivative. Once we know what a derivative is, we will learn many techniques of differentiation and applications to differentiation. We will finish the course with a basic introduction to sequences which will get us ready for the next course.									
This course will offer peer teaching in class as a type of active learning.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: Calculus Early Transcendentals 9th Edition by James Stewart (Cengage Learning) ISBN-13: 978-1337613927									
Reference books: Pre-Calculus Mathematics for Calculus 7th Edition by James Stewart (Brooks/Cole Pub Co) ISBN-13: 978-1305071759									
Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Students need to have a decent understanding of the concepts covered in Pre-Calculus about functions, their graphs and their properties. It is advised that students should feel comfortable asking questions in and outside of the class. Further, students should take the worksheet problems in class serious in order to understand the topics covered in class. Students should eventually understand that making mistakes is crucial for their learning.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	a, d, g, i	Students will be able to understand the purpose of finding the limits of functions.							
②	a, d, g, i	Students will be able to understand the meaning of a derivative.							
③	a, d, g, i	Students will be able to understand how to apply different techniques of differentiation.							
④	a, d, g, i	Students will be able to understand how to sketch graphs of functions by using derivatives.							
⑤	a, d, g, i	Students will be able to understand different applications of derivatives.							
⑥

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students are curious, ask a lot of questions and show willingness to try new ideas, no matter of failure. Further, students understand that making mistakes is crucial to learning. Therefore, students go back and correct any mistakes they might have encountered in their work/HW/quizzes/exams. In essence, students learn the procedure of learning.	Students address their weaknesses in specific topics and form a plan in order to succeed in Calculus.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)

Course Objectives								
Keywords (10.5pt)			Learning Objectives (10.5pt)					
1	Anti-Derivatives		Students will be able to know the concept of an anti-derivative, show the relationship between the integral and the derivative, understand various methods of integration, use integration as a tool in finding areas and volumes.					
2	Riemann's Sum							
3	Integrals							
4	Areas							
5	Volumes							
Course Description and Expectations for Students (10.5pt)								
This course will start with the idea of how to find the area under curves using limits and summations. We will then understand how using limits and summations to find areas under curves is using the idea of Riemann's Sum. This then allows us to understand how calculating area under curves brings out the notion of integration. The Fundamental Theorem of Calculus connects what we learned in the first semester of differentiation to the new notion of integration. Different integration techniques will be studied, followed by how to calculate areas and volumes of different shapes by integration. This course will offer peer teaching in class as a type of active learning.								
Required Materials (textbooks, reference books, reserved books) (10.5pt)

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students are curious, ask a lot of questions and show willingness to try new ideas, no matter of failure. Further, students understand that making mistakes is crucial to learning. Therefore, students go back and correct any mistakes they might have encountered in their work/HW/quizzes/exams. In essence, students learn the procedure of learning.	Students address their weaknesses in specific topics and form a plan in order to succeed in Calculus.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Syllabus/Class Introduction Antiderivatives 1	Lecture Worksheet	Read Section 4.9. Read the syllabus. Finish worksheet/HW.	30
2 /	Antiderivatives 2	Quiz Lecture Worksheet	Read Section 4.9. Finish worksheet/HW.	30
3 /	Riemann Sum 1	Quiz Lecture Worksheet	Read Section 5.1. Finish worksheet/HW.	30
4 /	Riemann Sum 2	Quiz Lecture Worksheet	Read Section 5.1. Finish worksheet/HW.	30
5 /	The Definite Integral 1	Quiz Lecture Worksheet	Read Section 5.2 and 5.3. Finish worksheet/HW.	30
6 /	The Definite Integral 2	Quiz Lecture Worksheet	Read Section 5.2. Finish worksheet/HW.	30
7 /	Properties of the Definite Integral 1	Quiz Lecture Worksheet	Read Section 5.2. Finish worksheet/HW.	30
8 /	Properties of the Definite Integral 2	Quiz Lecture Worksheet	Read Section 5.2 and 5.5. Finish worksheet/HW.	30
9 /	The Substitution Rule 1	Quiz Lecture Worksheet	Read Section 5.5. Finish worksheet/HW.	30
10 /	The Substitution Rule 2	Quiz Lecture Worksheet	Read Section 5.5. Finish worksheet/HW.	30

Course Schedule

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Matrices – Linear equations		Students will be able to define a matrix and recognize its properties, understand how to use matrices for solving linear equations, solve some real life application problems using matrices, know the equations for a parabola, ellipse and hyperbola, and understand some applications from the real life that uses such shapes.						
2	Determinants – Cramer rule								
3	Conic Sections-Parabolas								
4	Ellipse								
5	Hyperbola								
Course Description and Expectations for Students (10.5pt)									
In the first part of this course, students will study the notion of basic linear algebra. That is, they will look at simultaneous equations and convert them into matrices. Then, they will learn how to solve linear equations using matrices and apply their knowledge to solve some real-life application problems. Students will also learn the algebra and properties of matrices. In the second part, students will learn about conic sections such as parabolas, ellipses, and hyperbolas. They will study the equations of each shape and the proofs of those equations. In addition, they will learn how such shapes are used in useful and different real-life applications. It is advised that students pay attention to understand the topic of each class very well, ask questions during the class, and submit the assignments on time. The lecture style of this course is conducted through a discussion and Q&A between the teacher and students in order to get them involved in to the class. In addition, students help each other through peer learning during the work sheet solving time. These are two types of the active learning applied in the class.									
【Required Materials (textbooks, reference books, reserved books)】									
Textbooks: Pre-Calculus Mathematics for Calculus 7 th Edition by James Stewart- CENGAGE-ISBN 978-1305071759

Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Students need to have a basic understanding of equations and geometry. It is advised that students should feel comfortable asking questions in and outside of the class. Further, students should take the worksheet problems in class serious to understand the topics covered in class. Students should eventually understand that making mistakes is crucial for their learning.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	a, g, i	Students will be able to define a matrix and recognize its properties.							
②	a, d, g, i	Students will be able to understand how to use matrices for solving systems of linear equations.							
③	a, d, f, g	Students will be able to find the determinant and inverse of a matrix.							
④	a, d, g, i	Students will be able to solve different real life applications problems using matrices.							
⑤	a, d, g, i	Students will be able to define a parabola, ellipse, hyperbola, graph them and recognize their properties.							
⑥	a, g, i	Students will be able to understand how such shapes are useful in making some daily used devices							
Evaluation Criteria

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Hyperbolic functions.		Students will learn about hyperbolic functions and how they are related to hyperbolas and understand how to represent equations in polar form, understand the difference between scalar quantities and vector quantities, learn about the properties of vectors and vector operations in 2D and 3D, look at different applications that incorporate vectors, know how to find the dot and cross product of two vectors, learn how to find vector equations of lines and planes in 3D, and study some vector applications in real-life.						
2	Polar coordinates.								
3	Vectors(2D)-Vectors(3D)								
4	Dot product-Cross Product(3D)								
5	Equations of lines-Equations of planes								
Course Description and Expectations for Students (10.5pt)									
This course is divided into 3 parts, the first part is related to hyperbolic functions and polar coordinates. The second part is related to vectors in 2D and the third part is related to vectors in 3D. Students will learn the definition of hyperbolic functions and its relation to hyperbola. They will know about the polar coordinates and how to represent and graph equations using polar system. Then they will learn about definition and properties of vectors in 2D, how to do different operations on vectors in 2D such as addition subtraction and multiplying by a scalar, and their applications in real life. The dot product of two vectors in 2D is important as it has many applications in real life, so student will know how to find it. After studying the vectors in 2D, students will learn about vectors in 3D and how to find the dot and cross product of two vectors in 3D and know about different applications. In 3D they will also learn about how to find equations of lines and planes and their applications. It is advised that students do their best by asking questions to understand the topic of each class very well as the topic of next classes depends up on the previous ones. The lecture style of this course is conducted through a discussion and Q&A between the teacher and students in order to get them involved in to the class. In addition, students help each other through peer learning during the work sheet solving time. These are two types of the active learning applied in the class.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
21 /	Applications of the Cross Product	Lecture Worksheet #18	Finish worksheet/HW. Preview content for L.#22	30
22 /	Equations of Lines	Lecture Worksheet #19	Finish worksheet/HW. Preview content for L.#23	30
23 /	Applications of Lines Part I	Lecture Worksheet #20	Finish worksheet/HW. Preview content for L.#24	30
24 /	Applications of Lines Part II	Lecture Worksheet #21	Finish worksheet/HW. Preview content for L.#25	30
25 /	Equations of Planes	Lecture Worksheet #22	Finish worksheet/HW. Preview content for L.#26	30
26 /	Applications of Planes Part I	Lecture Worksheet #23	Finish worksheet/HW. Preview content for L.#27	30
27 /	Applications of Planes Part II	Lecture Worksheet #24	Finish worksheet/HW. Review content for Test II	30
28 /	Review for Test II	Self-Study / Q&A	Finish worksheet/HW. Review content for Test II	80
29 /	TEST II		Review for Final Exam.	30
30 /	TEST II return Review for Final Exam	Self-Study / Q&A	Review for Final Exam.	120

Course schedule

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Electricity		Physics cultivates the ability to think systematically and logically about phenomena that are important to learn natural science and engineering. In this course, students will be able to deepen their knowledge about physical phenomena about electricity and magnetism. Students will also learn heat and thermodynamics.						
2	Magnetism								
3	Heat								
4	Thermodynamics								
5									
Course Description and Expectations for Students (10.5pt)									
In this course, - Students must submit all exercises, quizzes, and preview checks. - Late submission may reduce students' score. - All classes are conducted in English. - Students must take notes and submit them each month. Advice for students: - Physics A is a course that forms the base of Physics B, specialized courses in 4th and 5th grade. Be sure to understand the contents. If you have any questions, ask during classes, learning sessions, and/or schedule a meeting with a teacher during posted office hours. This course consists of preparations (preview check), classes (exercise/class work/quiz), and reviews. Be sure to work on preparations because understanding during classes will improve greatly.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: Reference books: Physics (HMH) ISBN 978-0-544-81773-9 Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Knowledge of Fundamental Physics A and B Fundamental skills of calculation									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	h,i	Students will be able to understand factors of electricity (field, potential, current etc.).							
②	h,i	Students will be able to understand magnetism.							
③	h,i	Students will be able to understand relationship between electricity and magnetism.							
④	h,i	Students will be able to understand heat and thermodynamics.							
⑤	d,h,i	Students will be able to understand physical phenomena through experiments and inquiry project.							
⑥	i	Students will be able to participate classes actively and review what you achieved.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students are able to identify and understand actual phenomena correctly with physical interpretation.	Students are able to understand physical phenomena.
Students are able to calculate and solve questions correctly using formulae.	Students are able to calculate and solve questions using formulae.
Students are able to understand units and their dimensions for each physical value discussed in the course.	Students are able to understand units of physical values.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 / 	Guidance Review of Buoyancy Understanding through the experiment	Guidance and experiment	Reading the given documents Reading textbook, then preview check	30
2 / 	Electrostatics Understanding Coulomb's law and electrostatic forces	Lecture and exercise	Confirming the unclear points	15
3 / 	Electrostatics Understanding Coulomb's law and electrostatic forces	Lecture and exercise	Finishing exercise and reviewing the class Reading textbook, then preview check	45
4 / 	Electric Field Understanding the electric fields	Lecture and exercise Quiz	Confirming the unclear points	15
5 / 	Electric Field Understanding the electric fields	Lecture and exercise	Finishing exercise and reviewing the class Reading textbook, then preview check	45
6 / 	Electric Potential Understanding the electric potential energy and electric potential	Lecture and exercise Quiz	Confirming the unclear points	15
7 / 	Electric Potential Understanding the electric potential energy and electric potential	Lecture and exercise	Finishing exercise and reviewing the class Reading textbook, then preview check	45
8 / 	Capacitance Understanding the capacitance	Lecture and exercise Quiz	Confirming the unclear points	15
9 / 	Capacitance Understanding the capacitance	Lecture and exercise	Finishing exercise and reviewing the class Reading textbook, then preview check	45
10 / 	Current and Resistance Understanding the electric current, Ohm's law, electric power, and Joule's heat.	Lecture and exercise Quiz	Finishing exercise and reviewing the class Reading textbook, then preview check	45

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	Magnets and Magnetic Fields Understanding the magnetic fields	Lecture and exercise	Confirming the unclear points	15
12 /	Magnets and Magnetic Fields Understanding the magnetic fields	Lecture and exercise	Finishing exercise and reviewing the class Reading textbook, then preview check	45
13 /	Magnetism from Electricity Understanding the Right-hand rule	Lecture and exercise Quiz	Confirming the unclear points	15
14 /	Magnetism from Electricity Understanding the Ampere's law	Lecture and exercise	Finishing exercise and reviewing class Reading textbook, then preview check	45
15 /	Electricity from Magnetism Understanding the electromagnetic induction	Lecture and exercise Quiz	Confirming the unclear points	15
16 /	Electricity from Magnetism Understanding the Faraday's law	Lecture and exercise	Finishing exercise and reviewing class Reading textbook, then preview check	45
17 /	Generators, Motors, Mutual inductance, and Transformers Understanding the mutual induction	Lecture and exercise Quiz	Confirming the unclear points	30
18 /	Heat transfer Understanding the various types of heat transfer	Lecture and exercise	Finishing exercise and reviewing class	15
19 /	Heat Understanding the specific heat capacity of matter	Lecture and exercise	Confirming the unclear points	45
20 /	Heat Understanding the heat expansion	Lecture and exercise	Finishing exercise and reviewing class	15

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
21 /	Change in Phase Understanding the latent heat and phase change	Lecture and exercise Quiz	Finishing exercise and reviewing class Reading textbook, then preview check	45
22 /	The First Law of Thermodynamics Understanding the processes of thermodynamics	Lecture and exercise	Confirming the unclear points	15
23 /	The First Law of Thermodynamics Understanding the adiabatic process	Lecture and exercise	Finishing exercise and reviewing class Reading textbook, then preview check	45
24 /	The Second Law of Thermodynamics Understanding the heat engines and entropy	Lecture and exercise Quiz	Finishing exercise and reviewing class	30
25 /	The Second Law of Thermodynamics Understanding the Carnot cycle	Lecture and exercise	Confirming the unclear points	15
26 /	Inquiry Based Project Researching the physical phenomenon, creating student's idea, and writing a report	Project Quiz	Continuing the assignment	15
27 /	Inquiry Based Project Researching the physical phenomenon, creating student's idea, and writing a report	Project	Continuing the assignment	15
28 /	Inquiry Based Project Researching the physical phenomenon, creating student's idea, and writing a report	Project	Finishing the report	45
29 /	Exercise Understanding the learned contents	Exercise	Reviewing the contents so far. Checking wrong answer	45
30 /	Exercise Understanding the learned contents	Exercise	Reviewing the contents so far. Checking wrong answer	45
31	Final exam		Review all materials	

Course Schedule

Dept. S General Required		Chemistry A		1	612400	First	Lecture Class		
Target Grade	Instructor		Office	E-mail Address			Office Hours		
2	RASHED, Nagwa Fekri		Hakusanroku C 101.201				Wednesday 15:00~		
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Properties of Solutions		In this course, students will determine solution concentrations and colligative properties. They will identify the direction of energy transfer in chemical and physical processes and distinguish between exothermic and endothermic processes. They will also explore reaction rates, reversible reactions, and the factors that determine equilibrium. Additionally, they will connect these theories to biochemical, industrial, and daily life applications.						
2	Thermochemistry								
3	Enthalpy								
4	Entropy								
5	Reaction Rates & Equilibrium								
Course Description and Expectations for Students (10.5pt)									
Chemistry A will include flipped classes, interactive discussions, lab demonstrations, problem-solving exercises, group experiments, peer teaching, investigative learning, and reflective learning, which are types of active learning.									
For better course achievements, please consider the following:									
- Students' safety comes first, so be constantly aware of your safety by following the Safety in the Chemistry Lab Rules.									
- Check eSyllabus regularly for updates.									
- Preview the specified sections in the textbook and other resources before attending class.									
- Take notes and summarize the topics of the following class by reading relevant book pages and watching the class videos, or accessing other related online resources before class time.									
- Use class time to confirm concepts by initiating discussions, answering practice problems, exercises, and conducting group experiments.									
- Participate actively in the discussions by asking questions and sharing your ideas with the course professor and classmates.									
- To build your portfolio, keep all the materials, such as class notes, experiment reports, and other assignments, in your folder.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: SAVVAS Chemistry (SAVVAS) ISBN 978-1-323-21353-7									
Reference books:									
Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
- Analysis and problem-solving									
- Time management and organization									
- Written and oral communication									
- Monitoring/maintaining records and data									
- Teamwork and research									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	d, h, i	Students will be able to express the concentration of solutions as molarity, percent by volume, or percent by mass.							
②	d, h, i	Students will be able to describe how the freezing-point depression and boiling-point elevation are related to molality.							
③	d, h, i	Students will be able to distinguish between endothermic and exothermic processes.							
④	d, h, i	Students will be able to determine the amount of energy absorbed or released in a chemical or physical process.							
⑤	d, h, i	Students will be able to determine whether a reaction is spontaneous.							
⑥	d, h, i	Students will be able to explore the role of energy and the methods used to control chemical reactions.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students are able to: - answer and give explanations of the essential questions by applying the taught chemistry knowledge and concepts. - design and perform experiments safely to find solutions or propose an explanation. - apply their problem-solving skills to solve complex problems whose solutions require multiple steps. - analyze, evaluate, or design a solution to a real-world problem by connecting their gained chemistry knowledge to daily lives and other subjects or fields of study	Students are able to: - answer the essential questions by applying the taught chemistry knowledge. - perform experiments safely, make observations, analyze given data, and use scientific thinking to draw conclusions - apply their problem-solving skills to solve problems whose solutions require multiple steps. - to connect their gained chemistry knowledge to daily lives and other subjects or fields of study.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Properties of Solutions - Identify the factors that affect how fast a substance dissolves. - Describe the equilibrium in a saturated solution and the factors that affect the solubility of a substance.	- Lecture - Practice problems - Exercises - Lesson 16.1 Book Qs	- Make notes and summaries of Lesson 16.1 before class. - Make notes and summaries of Lesson 16.2.	30
2 /	Concentrations of Solutions - Calculate the molarity of a solution. - Describe the effect of dilution on the total moles of solute in solution. - Express solution concentration as a percent by volume or percent by mass.	- Lecture - Practice problems - Exercises - Lesson 16.2 Book Qs.	- Make notes and summaries of Lessons 16.3 & 16.4.	30
3 /	Colligative Properties of Solutions - Explain how colligative properties can be explained on a particle basis. - Identify the two ways of expressing the ratio of solute to solvent in a solution.	- Practice problems - Exercises - Lesson 16.3 and Lesson 16.4 Book Qs.	- Read Small-Scale lab p. 545	30
4 /	Colligative Properties of Solutions - Describe how the freezing-point depression and boiling-point elevation are related to molality.	- Practice problems - Exercises - Lesson 16.3 and Lesson 16.4 Book Qs. - Small-Scale Lab	- Prepare for Chapter 16 General Test. - Make notes and summaries of Lesson 17.1.	30
5 /	The Flow of Energy - Explain how energy changes can occur. - Explain the law of conservation of energy. - Identify two factors on which the heat capacity of an object depends.	- Chapter 16 General Test - Class activity - Lesson 17.1 Book Qs	- Make notes and summaries of Lesson 17.2.	30
6 /	Measuring and Expressing Enthalpy - Describe how to measure the change in enthalpy of a reaction. - Describe how to express the enthalpy change for a reaction in a chemical equation.	- Teacher demo - Class activity - Practice problems - Exercises - Lesson 17.2 Book Qs.	- Make notes and summaries of Lesson 17.3.	30
7 /	Heat Changes of State - Compare the quantity of heat absorbed by a melting solid to the quantity released when the state of matter changes. - Describe the thermochemical changes that occur when a solution forms.	- Experiment - Practice Problems - Exercises - Lesson 17.3 Book Qs.	- Make notes and summaries of Lesson 17.4. - Read and prepare for Small-Scale Lab p. 583	30
8 /	Calculating Heats of Reaction - Identify two ways to determine the heat of the reaction when it cannot be directly measured.	- Lecture - Lesson 17.4 Book Qs. - Small-Scale Lab	- Prepare for Chapter 17 General Test. - Read Quick Lab p. 600 - Make notes and summaries of Lesson 18.1.	30
9 /	Rates of Reaction - Describe how to express the rate of a chemical reaction. - Identify four factors that influence the rate of a chemical reaction.	- Chapter 17 General Test. - Quick Lab - Exercises - Lesson 18.1 Book Qs.	- Make notes and summaries of Lesson 18.2.	30
10 /	The progress of Chemical Reactions - Describe the relationship between the specific rate constant's value and the chemical reaction's speed. - Describe how most reactions progress from start to finish.	- Lecture - Class Activity - Practice Problems - Exercises - Lesson 18.2 Book Qs.	- Make notes and summaries of Lesson 18.3.	30

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	Reversible Reactions and Equilibrium - Describe what happens at the molecular level in a chemical system at equilibrium. - Describe what the size of an equilibrium constant indicates about a system at equilibrium.	- Class Activity - Practice problems - Exercises - Lesson 18.3 Book Qs.	- Make notes and summaries of Lesson 18.4.	30
12 /	Solubility Equilibrium - Describe the relationship between the solubility-product constant and the solubility of a compound. - Predict whether precipitation will occur when two solutions are mixed.	- Teacher Demo - Practice problems - Exercises - Lesson 18.4 Book Qs.	- Make notes and summaries of Lesson 18.5.	30
13 /	Free Energy and Entropy - Identify the part entropy plays in a chemical reaction. - Identify the two factors that determine whether a reaction is spontaneous.	- Lecture - Practice problems - Exercises - Lesson 18.5 Book Qs.	- Read Small-Scale Lab p. 635	30
14 /	Free Energy and Entropy - Identify the part entropy plays in a chemical reaction. - Identify the two factors that determine whether a reaction is spontaneous.	- Small-Scale Lab	- Prepare for Chapter 18 General Test.	30
15 /	General Review - Review Chapters 16, 17, and 18.	- Chapter 18 General Test - Evaluating and reflecting on the progress of one's learning. - School Questionnaire	- Prepare for the Final Exam - Finalize the Portfolio	30
16 /	Final Exam	- Evaluating the progress of one's learning. - Submit the Chemistry A Portfolio.		30
17 /	Returning Final Exam results.	- Return the graded exams and portfolios - Evaluating and reflecting on the progress of one's learning.		30

2026 Syllabus

Instructor with "*" means an instructor with company experience

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S General Required		Chemistry B		1	612500	Second	Lecture Class		
Target Grade	Instructor		Office	E-mail Address			Office Hours		
2	RASHED, Nagwa Fekri		Hakusanroku C 101.201				Wednesday 15:00~		
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	pH		In this course, students will use pH to classify solutions as neutral, acidic, or basic and learn about neutralization. They will also describe redox reactions and relate them to electrochemical processes. Students will also explore the physical and chemical properties of organic compounds, which comprise most natural substances such as fuels, foods, and petrochemicals. Furthermore, they will connect the concepts covered to industrial and daily life applications.						
2	Neutralization Reactions								
3	Redox Reactions								
4	Electrochemistry								
5	Organic chemistry								
Course Description and Expectations for Students (10.5pt)									
Chemistry B will include flipped classes, interactive discussions, lab demonstrations, problem-solving exercises, group experiments, peer teaching, investigative learning, and reflective learning, which are types of active learning.									
For better course achievements, please consider the following: - Students' safety comes first, so be constantly aware of your safety by following the Safety in the Chemistry Lab Rules. - Check eSyllabus regularly for updates. - Preview the specified sections in the textbook and other resources before attending class. - Take notes and summarize the topics of the following class by reading relevant book pages and watching the class videos, or accessing other related online resources before class time. - Use class time to confirm concepts by initiating discussions, answering practice problems, exercises, and conducting group experiments. - Participate actively in the discussions by asking questions and sharing your ideas with the course professor and classmates. - To build your portfolio, keep all the materials, such as class notes, experiment reports, and other assignments, in your folder.									
Required Materials (textbooks, reference books, reserved books) (10.5pt) Textbooks: SAVVAS Chemistry (SAVVAS) ISBN 978-1-323-21353-7 Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
- Analysis and problem-solving - Time management and organization - Written and oral communication - Monitoring/maintaining records and data - Teamwork and research									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	d, h, i	Students will be able to define acids, bases, and salts.							
②	d, h, i	Students will be able to identify the meaning of pH and the neutralization reactions.							
③	d, h, i	Students will be able to describe oxidation-reduction reactions.							
④	d, h, i	Students will be able to relate redox reactions to electrochemical processes.							
⑤	d, h, i	Students will be able to name and classify basic organic compounds.							
⑥	d, h, i	Students will be able to explore the properties of organic compounds.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students are able to: - answer and give explanations of the essential questions by applying the taught chemistry knowledge and concepts. - design and perform experiments safely to find solutions or propose an explanation. - apply their problem-solving skills to solve complex problems whose solutions require multiple steps. - analyze, evaluate, or design a solution to a real-world problem by connecting their gained chemistry knowledge to daily lives and other subjects or fields of study	Students are able to: - answer the essential questions by applying the taught chemistry knowledge. - perform experiments safely, make observations, analyze given data, and use scientific thinking to draw conclusions - apply their problem-solving skills to solve problems whose solutions require multiple steps. - to connect their gained chemistry knowledge to daily lives and other subjects or fields of study.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Acid-Base Theories - Define an acid and a base according to Arrhenius and Lewis. - Distinguish an acid from a base in Bronsted-Lowery theory.	- Lecture - Practice Problems - Exercises - Lesson 19.1 Book Qs.	- Make notes and summaries of Lesson 19.1 before class. - Make notes and summaries of Lesson 19.2	30
2 /	Hydrogen Ions and Acidity - Describe how $[H^+]$ and $[OH^-]$ are related in an aqueous solution. - Using pH, classify a solution as neutral, acidic, or basic, and identify two methods to measure pH.	- Teacher Demo - Practice Problems - Exercises - Lesson 19.2 Book Qs.	- Make notes and summaries of Lessons 19.3, 19.4 and 19.5	30
3 /	Strength of Acids and Bases & Neutralization Reactions and Salts in Solutions - Describe how acids and bases are described as strong or weak. - Identify the products that form when an acid and a base react and the equivalence point.	- Teacher Demo - Practice Problems - Exercises - Lessons 19.3, 19.4 and 19.5	- Prepare for Chapter 19 General Test - Make notes and summaries of Lesson 20.1	30
4 /	The Meaning of Oxidation and Reduction - Describe what happens to a substance that undergoes oxidation and a substance that undergoes reduction. - Explain how the presence of salts and acids accelerates the corrosion of metals.	- Chapter 19 General Test - Practice Problems - Exercises - Lesson 20.1 Book Qs.	- Make notes and summaries of Lesson 20.2 & 20.3	30
5 /	Oxidation Numbers & Describing Redox Equations - State the general rules for assigning oxidation numbers. - Define oxidation and reduction in terms of a change in oxidation number - Identify the two classes of chemical reactions.	- Practice Problems - Exercises - Lesson 20.2 and 20.3 Book Qs.	- Make notes and summaries of Lesson 21.1	30
6 /	Electrochemical Cells - Describe how a voltaic cell produces electrical energy. - Identify the current applications that use electrochemical processes to produce electrical energy.	- Experiment - Practice Problems - Exercises - Lesson 21.1 Book Qs.	- Make notes and summaries of Lesson 21.2	30
7 /	Half-cells and Cell Potentials - Identify what causes the electrical potential of an electrochemical cell. - Determine the standard reduction potential of a half-cell and whether a redox reaction is spontaneous or nonspontaneous.	- Experiment - Exercises - Practice Problems - Exercises - Lesson 21.2 Book Qs.	- Make notes and summaries of Lesson 21.3 - Read Quick Lab p. 750 and Small-Scale Lab p. 752	30
8 /	Electrolytic Cells - Distinguish between electrolytic and voltaic cells. - Describe some applications that use electrolytic cells.	- Experiment - Exercises - Practice Problems - Lesson 21.3 Book Qs.	- Prepare for Chapter 20 & 21 General Test. - Make notes and summaries of Lesson 22.1	30
9 /	Hydrocarbons - Explain why a carbon atom forms four covalent bonds. - Identify two possible arrangements of carbon atoms in an alkane.	- Chapters 20 & 21 General Test - Class Activity - Practice Problems - Lesson 22.1 Book Qs.	- Make notes and summaries of Lessons 22.2 and 22.3	30
10 /	Unsaturated Hydrocarbons and Isomers - Describe the structural characteristics of alkenes and alkynes - Explain how the properties of constitutional isomers differ. - Identify two types of stereoisomers.	- Class Activity - Practice Problems - Lessons 22.2 and 22.3 Book Qs.	- Make notes and summaries of Lessons 22.4 and 22.5	30

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	Hydrocarbon Rings and Hydrocarbons from Earth's Crust - Identify the general structure of a cyclic hydrocarbon and bonding in a benzene ring - Identify the hydrocarbons in natural gas and the first step in refining petroleum.	- Class activity - Practice Problems - Exercises - Lessons 22.4 and 22.5 Book Qs.	- Make notes and summaries of Lesson 23.1	30
12 /	Introduction to Functional Groups - Classify organic compounds. - Identify the general formula of a halocarbon. - Describe how substitutional reactions are used in organic chemistry. Alcohols, Ethers, and Amines - Identify the general formula of an alcohol, an ether, and an ester - Explain how addition reactions are used in organic chemistry.	- Class activity - Practice problems - Exercises - Lessons 23.1 & 23.2 Book Qs	- Make notes and summaries of Lesson 23.3	30
13 /	Carbonyl Compounds and Polymers - Identify the structural characteristics that an aldehyde and acetone share. - Identify the general formula of a carboxylic acid and an ester.	- Practice Problems - Exercises - Lesson 23.3 Book Qs. - Experiment	- Make notes and summaries of Lesson 23.4	30
14 /	Polymers - Describe how polymers are formed. - Classify polymerization reactions as addition or condensation reactions.	- Practice Problems - Exercises - Lessons 23.4 - Experiment	- Prepare for Chapter 22 & 23 General Test.	30
15 /	General Review - Review Chapters 19, 20, 21, 22, and 23	- Chapters 22 & 23 General Test - Evaluating and reflecting on the progress of one's learning. - School Questionnaire	- Prepare for the Final Exam - Finalize the Portfolio	30
16 /	Final Exam	- Evaluating the progress of one's learning. - Submit the Chemistry B Portfolio.		30
17 /	Returning Final Exam Results.	- Return the graded exams and portfolios - Evaluating and reflecting on the progress of one's learning.		30

2026 Syllabus

Instructor with “*” means an instructor with company experience

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S General Elective		Biology A		1	624500	First	Experiment Class		
Target Grade	Instructor		Office	E-mail Address			Office Hours		
2	ATILLO, Krishia		Hakusanroku C: 101.201				Monday-Friday 12:30-21:30		
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Life		In this course, students will understand the basics of life and the principles of ecology. Students will explore and analyze the lessons through various hands-on and engaging activities that spark their interest in biology. Furthermore, this course teaches how different parts work together and is transferable to engineering, wherein systems thinking is essential for designing and improving everything from machines to software.						
2	Cells								
3	Photosynthesis								
4	Cellular Respiration								
5	Ecology								
Course Description and Expectations for Students (10.5pt)									
The course will offer a variety of hands-on learning activities, inquiry-based lectures, and discussions. This course will tackle the scientific study of life, cells, which are the units of life, photosynthesis, cellular respiration, organisms and their relationships, flow of energy in an ecosystem, cycling of matter, communities, biomes, and ecosystems. Students will be given ample time to complete their worksheets or activities in class. Lesson presentations will accompany each class and will be available for the students. To attain the objectives of this course, students are encouraged to be creative and participative. Students are also expected to turn in their worksheets and activities and prepare for presentations.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks: None Reference books: Biology Concepts & Investigations 5th Ed/Glencoe Biology ISBN: 9781260575880/9780076774289 Reserved books: None									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Students need to have analysis and problem-solving skills, creativity, and basic computer skills for this course.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	h, i	Students will be able to explain what life is in his/her own understanding.							
②	h, i	Students will be able to classify different cell types (plant and animal) and specify the function(s) of each.							
③	h, i	Students will be able to describe the major features and chemical events in photosynthesis and cellular respiration.							
④	h, i	Students will be able to illustrate the major features and sequence the chemical events of cellular respiration.							
⑤	h, i	Students will be able to define the interactions between the levels of biological communities.							
⑥	h, i	Students will be able to simplify how different biomes are distinguished based on climate and their features.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students will foster a deeper sense of understanding about life and the different cell types. Students will appreciate the importance of photosynthesis and cellular respiration. Students will strengthen their critical thinking skills regarding how interactions affect the different levels of biological communities. Students will learn how to investigate and discuss the different biomes based on their climate and features.	Students will gain more knowledge regarding life and cells. Students will be more aware of the importance of photosynthesis and cellular respiration and the different principles of ecology.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Presentations	①	Creating models of lungs, the digestive system, and DNA will be described, clarified, and explained by the students. Students will be given rubrics to use as a guide during their presentations. Since they have to create a model for the lungs, digestive system, and DNA, students will have plenty of time to get ready. Forty percent (40%) of the total grade is based on the presentation.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students will foster a deeper sense of understanding about the different human body systems. Students will appreciate the importance of learning genetics and basic patterns of human inheritance. Students will learn how to describe and discuss the importance of learning biotechnology.	Students will gain more knowledge regarding human body systems. Students will be more aware of the importance of genetics and biotechnology in today's world.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Course Syllabus discussion The Human Body Systems - The Integumentary System	Lesson Experiment: Examine Chicken Skin	Laboratory report	30
2 /	The Human Body Systems - The Skeletal and Muscular Systems	Experiment: Examine Chicken Bone Attachments	Laboratory report	30
3 /	The Human Body Systems - The Nervous System	Lesson Data Analysis Lab	Laboratory report	30
4 /	The Human Body Systems - The Nervous System: The Senses	Lesson Experiment: Investigate Adaptations to Darkness	Laboratory report	30
5 /	The Human Body Systems - The Circulatory System	Experiment: Pig/Chicken Heart Dissection	Laboratory report	30
6 /	The Human Body Systems - The Respiratory System	Lesson Activity: Make a Lung Model	Presentation	30
7 /	The Human Body Systems - The Digestive System	Lesson Activity: Digestive System Model Making using clay	Presentation	30
8 /	The Human Body Systems - The Respiratory System	Lesson Activity: Make a Lung Model	Presentation	30
9 /	The Human Body Systems - The Reproductive System	Lesson	Worksheet	30
10 /	Genetics - Mendelian Genetics	Lesson Activity: Predict Probability in Genetics

Course Objectives									
Keywords			Learning Objectives						
1	Sportsmanship		The student will learn how to work in sport teams to effectively build bonds with others. The student will learn and practice how to develop aerobic fitness through interval training. The student will demonstrate understanding of Volleyball and Badminton tactics and strategy. The student will learn how to deal with the psychological pressure of sport and competition and appreciate the many roles sport offers.						
2	Safety								
3	Sports								
4	Exercise								
5	Health								
Course Description and Expectations for Students									
In this course students will make sports teams and compete in Volleyball and Badminton games, managing, refereeing, cheering, and taking on the many roles that are involved within running a sports contest. Improving technique and understanding tactics will be a key component of the class, non-active roles will be just as valued. Exercise will be focused on using MAS (maximal aerobic fitness) to improve aerobic fitness for life, when weather permits, along with other health based content.									
The expectation is for students to be on time for class in the correct uniform and fully participate in the activities of class to the best of their abilities, while maintaining a respectful attitude and an inclusive atmosphere. This course will offer student led activities and practical learning in class as a type of active learning.									
This course is a practical course and so inability to physically partake in activities – specifically learning of sport skills may result in a reduced score unless alternative work is given. Students who have disabilities preventing participation may be given alternate work, and injured students may request makeup classes outside of the class schedule, if they have taken care to manage their injuries throughout the healing process.									
Required Materials (textbooks, reference books, reserved books) Textbooks: Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites)									
Required knowledge is the safe use of Hakusanroku facilities. Helpful but not needed skills are Prior fundamental skills in Badminton and Volleyball.									
No.	Program Objectives	Target Abilities for Students							
①	d	Students will learn how to train their body correctly for a healthy life.							
②	f	Students will be able to learn from failure and develop fortitude.							
③	i	Students will develop confidence in their abilities and work with a sincere heart.							
④	i	Students will learn the value of enjoying sports and the lifelong benefits of exercise.							
⑤	c	Students will be able to support each other in learning new skills.							
⑥	b	Students will become accustomed to working for the good of others.

1	感じる力		作品に込められた作者の意図あるいは制作に至った経緯、制作行程などから芸術の創造に対する思慮を深め、観察力・洞察力を養う。学生は、自己が表現者となり、個々の表現物についての言語化を図りながら、論理的思考能力を養う。最終的には、ビジュアル表現による変換をもって、理論と感性の調和による高度な成果の創出ができることを目標とする。エンジニアとして幅広い視野をもち、創造性の発揮と自己解決に至るため、気づき能力と具現化能力の育成を行う。						
2	着眼点								
3	発想								
4	デザインプロセス								
5									
授業の概要および学習上の助言									
①アイデアの言語化 創造力を高めるために広い視野をもつ重要性を理解する。 創造力を高めるために多くの情報をもつ重要性を理解する。 創造したものの有効性なものに導くための論理的思考展開をする。									
②アイデアの視覚化による思考 創造力を高めるためには視覚化することが重要であることを理解する。（スケッチやモデルによる思考展開）									
③アイデアの伝達 自分の作品における思いを表現することにより学生の伝達スキルを磨く。									
④作品の鑑賞 15週は全員の作品をスクリーンで発表し、講評を受ける。これは自分以外の全作品を見て、評価し合うことでお互いの創造力を刺激し高めることを目的としている。									
この授業ではアクティブラーニングの一環として、新たな発見から創造に至るまでの自ら導く創造的な活動を行います。									
【教科書および参考書・リザーブドブック】 教科書： 参考書： リザーブドブック：									
履修に必要な予備知識や技能									
丁寧に考え、丁寧に作ろうとする姿勢が必要です。 グラフィックソフトを使用するので作業時に使えるように復習しておくことが必要です。 すべての課題を提出期限に間に合うように必ず提出すること。 未提出課題が1つでもある場合、単位を認めない。 提出期限を守れなかった場合は減点となる。									
No.	教育目標(DP) (記号表記)	学生が達成すべき行動目標							
①	g	様々な角度からものごとを観察し、考えることができる							
②	g	何が有効なアイデアなのかを見極めることができる							
③	f	重要なポイントを整理し、簡潔に表現することができる							
④	i	グラフィックソフトで何が出来かを理解することができる							
⑤	f,g,i	パネル化による視覚伝達を通して伝達スキルの重要性と有効性を理解できる							
⑥	f	表現者の創造的活動への思いを理解することができる

C L I P 学習プロセスについて

一般に、授業あるいは課外での学習では：「知識などを取り込む」→「知識などをいろいろな角度から、場合によってはチーム活動として、考え、推論し、創造する」→「修得した内容を表現、発表、伝達する」→「総合的に評価を受ける、Good Work!」：のようなプロセス（一部あるいは全体）を繰り返し行いながら、応用力のある知識やスキルを身につけていくことが重要です。このような学習プロセスを大事に行動ください。
 ※学習課題の時間欄には、指定された学習課題に要する標準的な時間を記載してあります。学修単位科目については、各授業に応じた時間（例えば2単位科目の場合、予習・復習で200分／週）を取るよう努めてください。詳しくは教員の指導に従ってください。

C L I P 学習プロセスについて

一般に、授業あるいは課外での学習では：「知識などを取り込む」→「知識などをいろいろな角度から、場合によってはチーム活動として、考え、推論し、創造する」→「修得した内容を表現、発表、伝達する」→「総合的に評価を受ける、Good Work!」：のようなプロセス（一部あるいは全体）を繰り返し行いながら、応用力のある知識やスキルを身につけていくことが重要です。このような学習プロセスを大事に行動ください。
 ※学習課題の時間欄には、指定された学習課題に要する標準的な時間を記載してあります。学修単位科目については、各授業に応じた時間（例えば2単位科目の場合、予習・復習で200分／週）を取るよう努めてください。詳しくは教員の指導に従ってください。

回数 日付	学習内容	授業の運営方法	学習課題(予習・復習)	時間(分)
11 ／	芸術や文化と思想を理解し、自らの考えを表現② 合成データ作成（完成イメージ）	講義 合成作業	予習：制作計画のチェック 復習：作業遅延分の実施	30
12 ／	芸術や文化と思想を理解し、自らの考えを表現② 伝達手段を学びまとめる グラフィックコミュニケーション （パネルデータ作成）	講義 パネルデータ作業	予習：制作計画のチェック 復習：作業遅延分の実施	30
13 ／	芸術や文化と思想を理解し、自らの考えを表現③ 伝達手段を学びまとめる グラフィックコミュニケーション （パネルデータ作成）	講義 パネルデータ作業	予習：制作計画のチェック 復習：作業遅延分の実施	30

授 業 科 目 の 学 習 教 育 目 標									
キーワード			学習教育目標						
1	表現力	グローバルイノベーターとして国際社会で活躍するには、異文化の人々と協働の際のコミュニケーションが大切である。そのコミュニケーションを豊かで強力なものにするには、表現力が不可欠である。本授業では、歌唱、ナレーション、プレゼンテーションなどを学び体験し、各学生が独創的で強力な表現力を身につけることを目標とする。							
2	独創性								
3	歌唱								
4	鑑賞								
5	パフォーマンス								
授業の概要および学習上の助言									
一年生で受講したパフォーミングアーツⅠの内容をさらに拡大し表現力を身につける。一年生で学習した正しい発声法を用いての歌唱を引き続き行うことにする。スタンダードナンバー、J-POP、ミュージカルナンバー、アニメソングなどを練習する。また、プレゼンテーション技術やアニメの吹き替えなども学び体験する。人前で発表することへの恥ずかしさを乗り越え挑戦を続けていく。クラスメイトのパフォーマンスに対して、常に敬意をもちまた前向きなアドバイスや感想が述べられるクラス環境と人間関係を構築する努力をお互い行うことが大切である。									
この授業ではアクティブラーニングの一環として体験学習を行う。									
【教科書および参考書・リザーブドブック】 教科書： 参考書： リザーブドブック：									
履修に必要な予備知識や技能									
プロのパフォーマンス、例えばミュージシャン、ダンサー、バラエティ番組の進行役などを、テレビで見ておくことが授業を受けることに大きく役立つ。人前で表現できる各自の得意分野について考えてみる。									
No.	教育目標(DP) (記号表記)	学生が達成すべき行動目標							
①	f	正しい発声法を身につけ、歌唱できるようになる。							
②	e	ナレーションや朗読ができるようになる。							
③	i	歌唱やプレゼンテーションの際の表現技術を身につけることができるようになる。							
④	d	クラスメイトのパフォーマンスをまじめに敬意をもって鑑賞できるようになる。							
⑤

Instructor with “*” means an instructor with company experience

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S Specialized Required		Engineering Design IIA		2	508000	First	Experiment/Practice Class		
Target Grade	Instructor		Office	E-mail Address		Office Hours			
2	MATSUSHITA, Omihito/OGAWA, Hayato/ KUSHIMA, Yoshihiro / KODAKA, Arihiro		Hakusanroku C: 101.201			Mon – Friday: 4:30 – 5:30 pm			
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Problem-solving		In this course, students will practice with a problem-solving project, creating locally appropriate solutions and added values around Hakusanroku area. The students will learn the approaches to project planning, user research, and idea generation utilizing its local resources. The students will also cultivate abilities to find real problems with deeper insights and develop communication skills to propose solutions to communities appropriately.						
2	Locally appropriate solutions								
3	Project planning								
4	User research								
5	Communication skills								
Course Description and Expectations for Students (10.5pt)									
This course will offer project-based learning in class as a type of active learning. The students will work on problem-solving projects themed under the societal, natural, or industrial environments of Hakusanroku area. The projects will mainly focus on agri-business utilizing local resources and technology development projects focusing on the animal damage prevention system and land resource utilization. Based on the group’s project scopes, each group will work on their plans for business design and implementation, as well as technology development using AI, IoT, and other appropriate technologies. The work will be continued to the EDIIB course.									
Advice on taking this class - Act with appropriate manners and behaviors as important aspects of conducting research in local areas. - Submit assignments on time. There will be penalty points if you are late to submit your assignments. - Understand that this project is not a sequential process, rather it is a process of going back and forth by trials and errors - Participate in class work autonomously. Don’t afraid to challenge yourself and feel free to ask questions.									
Required Materials (textbooks, reference books, reserved books) Textbooks: None Reference books: None Reserved books: None									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
EDIA & IB: Team, task, and time management skills. Understanding of design and user research methodology and mindsets.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	b, e, h	Students will be able to understand issues from different perspectives which the local communities face.							
②	a, d, g	Students will be able to generate locally appropriate solutions or to develop technological functions to problems with teams.							
③	a, d, g	Students will be able to make their idea concepts and goal plans to convey their important ideas.							
④	f	Students will be able to deliver their findings and ideas effectively.							
⑤	c, d	Students will be able to practice a problem-solving project efficiently using proper management methods.							
⑥	i	Students will be able to show their attitudes to reflect on their own work objectively.

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Problem-solving		The students will learn the approaches to implement the locally appropriate solutions, evaluate the effectiveness of solutions, their iteration, and sustainable implementation of their projects. The students will also cultivate a sense of ethics as a part of a local community and autonomy by reflecting on own involvement with the locals and on own actions to take.						
2	Locally appropriate solutions								
3	Societal, natural, industrial environment								
4	Project planning								
5	Communication skills								
Course Description and Expectations for Students (10.5pt)									
This course will offer project-based learning in class as a type of active learning. The students will continue their regional problem-solving projects and technology development from Engineering Design IIA. Based on the group’s project scopes, each group will work on their plans for business promotion and implementation and technology development using AI, IoT, and other appropriate technologies. Those outcome evaluation will be also required at the end of the semester. Advice on taking this class - Act with appropriate manners and behaviors as important aspects of implementation and evaluation in local areas. - All the assignments must be submitted to pass the class. There will be penalty points if you are late to submit your assignments. - Understand that this project is not a sequential process, rather it is a process of going back and forth by trials and errors. - Participate in class work autonomously. Practice what they have planned to do in design research, ideation, prototyping, and evaluation stages. - Please keep group work progress report to review later.

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Machine Learning		All Students must have a fundamental understanding of programming and machine learning architecture going into the 2 nd year projects. The students will need experience in programming code to do Machine learning and use the provided modules to understand how the program is used to collect data, create training files and how AI responds to input data.						
2	Artificial Intelligence								
3	Robotics								
4	IoT								
5	Python								
Course Description and Expectations for Students (10.5pt)									
This class will cover basic robotic concepts using a Jetbot chassis and jetbot.org programming examples. Concepts such as programmatic motor control, Wi-Fi connectivity, custom artificial intelligence, rule-based machine learning, neural network convolution applications, neural network data collection and training will be introduced to students. Python programming is used in this class with Jetson Nano. The python code is broken down into section illustrating each section of coding and can be compiled individually for easier understanding of the python code and ease of trouble shooting, with the aid of Jupyter notebook coding environment. Arduino is introduced to students for understanding serial and digital information and circuitry.									
Advice on taking this course:									
• Have laptops or notebooks ready before class starts									
• Check E-syllabus and box app often and download all files needed for today’s lesson									
• Submit assignments on time.									
• Feel free to ask questions during office hour.									
This course will offer discovery learning, problem-solving learning, experiential learning, investigative learning in class as a type of active learning.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
Students understand the implementation of the experimental setup of image recognition and alert. With a general understanding of IoT and how AI is controlled and used. Program a AI system that can be custom to user and also can learn on its own to navigate through space. Students gain interest and motivation to design and conduct a project in ED2A/B.	Students understand the implementation of the experimental setup of image recognition and ability to control a robot chassis. With a general understanding of IoT and what AI is and how we can use it in our daily lives. Students gain interest and motivation to design and conduct a project in ED2A/B.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Syllabus guidance AI introduction Python introduction - Programming language Jupyter interface	- Intro into AI computing - Intro into python Jetbot chassis with Jetson setup	Store and note Jetbot number you use Connect Jetbot to charger	30
2 /	Jetson and Python introduction - Hardware introduction - Software introduction Connection information	- Jetbot chassis with Jetson setup cont	Make sure Jetbot is charged and ready to go Look for any loose parts and tighten Connect Jetbot to charger	30
3 /	Basic Motion 1 operation and understanding python code	Jupyter Lab interface use and wireless connection setup	Make sure Jetbot is charged and ready to go Look for any loose parts and tighten	30
4 /	Basic Motion 2 operation controlling the Jetbot wirelessly	- wireless network and computer setup	Jupyter Familiarization Answer questions on today's topics	30
5 /	Image recognition and using Machine learning data base Collision Avoidance operation 1	Understanding how to use Machine learning data	Answer questions on today's topics	30
6 /	Using images and convolution method to create model file Collision Avoidance operation 2 training for better avoidance in our world	Making own data for machine learning	Answer questions on today's topics Cont training	30
7 /	Collision Avoidance operation 3	Using student trained machine learning data	Answer questions on today's topics	30
8 /	Road Following operation 1 - Machine learning Course introduction and rules	New objective for machine learning	Answer questions on today's topics Cont training	30
9 /	Road Following operation 2 Road following Machine learning and collision avoidance model file creation	Extra rules and data entry for machine learning	Answer questions on today's topics Cont training	30
10 /	Road Following Operation wrap up - Course attack	Testing the model file created by student on road course	Answer questions on today's topics	30

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	Object following 1 Image recognition and tacking Machine learning	Create model file to track one specific object	Answer questions on today's topics Cont training	30
12 /	Object Following 2 Test Model file	Testing the model file created by student to follow students or teacher	Answer questions on today's topics	30
13 /	IoT with Arduino - IOT Introduction presentation Learn Arduino 1	- Introduction to IOT and Arduino. - Software installation and preparation. Build a simple electronic circuit.	Arduino familiarization assignment	30
14 /	IoT with Arduino 2 - ESP8266 WIFI module introduction. IoT Project 1 (LED blinking)	- Learn how to use ESP8266 WIFI module. Plan and execute Project 1.	Project 1 execution and worksheet.	30
15 /	IoT with Arduino 3 - Project 2 (Smart Home)	Plan and execute Project 2	Project 2 execution and worksheet.	30

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1 2 3 4 5	Programming Self-Directed Learning		Computer programming and computational thinking have been identified as essential skills in the 21 st century. In this course, students will examine fundamental concepts of computer programming. They will also practice applying programming knowledge to other areas of STEM before choosing an area of interest to study in more depth on their own.						
Course Description and Expectations for Students (10.5pt)									
Computer programming has become essential in almost every field. Programs are used everywhere from performing routine tasks to solving complex problems. This course will introduce students to computer programming. Students will be able to apply their programming knowledge through creating interactive projects. After having been exposed to different types of computer applications and tools across their two years of Computer Skills courses, students will gain more in-depth experience in an application that interests them. • Focus on class. Close unrelated programs on your laptop and listen when the teacher speaks. • Check E-Syllabus for reading & assignments days before they are due. • Submit each assignment on time, or talk to the teacher if you have trouble. • Do not be afraid to ask questions. This course implements active learning with a reverse classroom format, reading assignments are assigned as homework, which programming exercise work is done during class time.									
Required Materials (textbooks, reference books, reserved books) (10.5pt) Textbooks: <i>Python Crash Course, 3rd Edition</i> , No Starch Press, ISBN 978-1-7185-0270-3 Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Students must be able to use a PC to manage files and software. In addition to this knowledge, students must also be able to discover and use various resources for learning some new Information Technology (IT) topic.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	b	Recognize the importance of computational thinking in the modern world							
②	h	Identify basic concepts of computer programming							
③	e, i	Reflect on one’s own interests to develop an idea for a self-directed project							
④	a, h	Apply computer programming skills to other STEM fields							
⑤									
⑥

	④	
	⑤	
	⑥	
Reports	①	Reports are assignments from the teacher that are written either by hand or digitally as part of in-class activities. They represent the student's learning of material taught during the guided exercises of each class. In general, if a student submits one of these assignments late, their score will lose 20% of the maximum possible points on the assignment. Caution: work found to be copied from another student or the web without proper attribution will result in the offending student(s) receiving a 0 for that assignment
	②	
	③	
	④	
	⑤	
	⑥	
Presentations	①	There is a presentation at the end of the STEM programming project. Giving students an opportunity share their final work.

Specific Achievement Criteria

Description of Ideal Achievement (10.5pt)	Description of Standard Achievement (10.5pt)
① Recognize the value of having skills in programming ② Explain functions, classes, and lists ③ Design a programming solution to a STEM problem ④ Create a study plan for developing skills of interest	① Identify areas where programming is used ② Identify variables, conditional statements, and loops ③ Frame a STEM problem in programming terms ④ Choose a topic of interest for further studying

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
1 /	Orientation and Review Students will receive an introduction to the course, install the necessary software.	Lecture Discussion Exercises	Review HTML & CSS from Computer Skills IB Read Chapter 1: The Basics in textbook	20 20
2 /	Variables and Data Types Students will learn about variables and simple data types	Lecture Exercises	Preview: Textbook Chapter 2 Review: The teacher will announce assignments in class.	30
3 /	Working with Lists Students will learn about lists in Python and how to use them to store data.	Lecture Exercises	Preview: Textbook Chapters 3 Review: The teacher will announce assignments in class.	30
4 /	Lists and Loops Students will learn about using loops and combining them with lists to process data repeatedly.	Lecture Exercises	Preview: Textbook Chapters 4 Review: The teacher will announce assignments in class.	30
5 /	If Statements Students will learn about if statements and other conditionals to allow for logic conditions in their programs.	Lecture Exercises	Preview: Textbook Chapters 5 Review: The teacher will announce assignments in class.	30
6 /	Dictionaries Students will learn about Python dictionaries and how they can be used to store various pieces of data which can be quickly retrieved.	Lecture Exercises	Preview: Textbook Chapters 6 Review: The teacher will announce assignments in class.	30
7 /	User Input and While Loops Students will learn how to incorporate user input into their program, and how to run a program indefinitely using while loops.	Lecture Exercises	Preview: Textbook Chapters 7 Review: The teacher will announce assignments in class.	30
8 /	Functions Students will learn about how to make functions to do repeated tasks.	Lecture Exercises	Preview: Textbook Chapters 8 Review: The teacher will announce assignments in class.	30
9 /	Classes Students will learn about grouping functions into classes to model real world objects.	Lecture Exercises	Preview: Textbook Chapter 9 Review: The teacher will announce assignments in class.	30
10 /	Classes Continued & Code Testing Students will learn how to use classes across different files, and how to create automated tests for their code.	Guidance Self-Study	Preview: Textbook Chapter 10 Review: The teacher will announce assignments in class.	30

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content (10pt)	Method (10pt)	Assignments (10pt) (Preview and Review)	Time (Minutes)
11 /	Programming STEM Project (1) Students will choose a project topic to implement with programming and devise a plan to create a solution.	Guidance Self-Study	Work on project Review: Textbook Chapter 11-20 (as needed)	30
12 /	Programming STEM Project (2) Students will develop their programming project	Guidance Self-Study	Work on project Review: Textbook Chapter 11-20 (as needed)	30
13 /	Programming STEM Project (3) Students will develop their programming project	Guidance Self-Study	Work on project Review: Textbook Chapter 11-20 (as needed)	30
14 /	Programming STEM Project (4) Students will finalize their programming project and prepare to present during the next class session.	Guidance Self-Study	T Work on project Review: Textbook Chapter 11-20 (as needed)	30
15 /	Programming STEM Project Presentation Students will present and demonstrate their finished project in front of the class.	Guidance Presentations	Submit all project files as directed by the teacher.	30

Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Artificial Intelligence History		Artificial Intelligence (AI) is a key discipline shaping the future of science, technology, and society. Students will study AI's history, evolution, and milestones, learn the principles of Machine Learning, including supervised and unsupervised learning, and understand Neural Networks and Deep Learning architectures. They will examine real-world AI uses across domains and critically assess ethical issues in AI development and deployment.						
2	Ethical considerations								
3	Machine learning								
4	Neural networks								
5	Deep Learning								
6	Generative AI								
Course Description and Expectations for Students (10.5pt)									
This course will offer experimental learning in class as a type of active learning. This comprehensive 15-lesson course offers a deep dive into Artificial Intelligence (AI), providing students with a thorough understanding of its fundamental principles, applications, and ethical considerations. Beginning with an introduction to AI, the course covers a wide range of topics, including machine learning, neural networks, deep learning, natural language processing, and computer vision. Each lesson includes engaging activities, ranging from hands-on exercises and group projects to discussions and debates, fostering not only theoretical understanding but also practical skills and critical thinking.									
Advice on taking this course: - Be Prepared: Review lecture slides beforehand. - Organize Your Work: Keep clear notes, structure code, and document projects. - Stay Hands-On: Participate actively in labs and practice sessions. - Seek Solutions: When facing challenges, investigate, troubleshoot, and ask questions.									
Required Materials (textbooks, reference books, reserved books) (10.5pt) Textbooks: Reference books: Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Students should have basic math and computer skills, be able to use web search effectively, and be willing to learn Python programming to understand AI fundamentals, apply machine learning concepts, and evaluate ethical implications.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	h, i	Students will be able to understand the fundamentals of Artificial Intelligence.							
②	a	Students will be able to explain basic concepts of Machine Learning.							
③	a, i	Students will be able to apply Python programming.							
④	h, g	Students will be able to organize and manage data structures.							
⑤	b, c, e	Students will be able to evaluate AI applications and consider ethical implications.

Course Objectives									
Keywords			Learning Objectives						
1	Computer Hardware		The aim of this course is to teach students the basics of how computers and networked devices operate, and how to properly use such devices and networks. The curriculum provides an introduction to the computer hardware and software skills needed to help meet the growing demand for entry-level information and communication technology (ICT) professionals. The curriculum covers the fundamentals of PC technology, networking, and security.						
2	Computer Software								
3	Network Communication								
4	Binary Numbers								
5	Information Security								
Course Description and Expectations for Students									
At the successful completion of this course, students will be able to: 1. Identify and explain the function of key components of modern computer hardware. 2. Perform basic conversion of decimal numbers to binary and hexadecimal. 3. Explain the fundamentals of computer algorithms, their theoretical operating time, and implement simple examples such as sort and search. 4. Explain the purpose of a programming language, and give examples of simple algorithms implemented in one. 5. Explain the purpose of an operating system and how one is structured. 6. Explain the fundamental structure of computer networks, as well as how data is transmitted on them, including over the internet. 7. Explain and implement the fundamentals of information security including cryptography and security protocols.									
This course implements active learning with in-class interactive activities and demonstrations replacing some lectures.									
Required Materials (textbooks, reference books, reserved books) Textbooks: D is for Digital (English Edition), Brian W. Kernighan, ASIN: B0075XZL2M Reference books: None Reserved books: None									
Knowledge/Skills Needed to Take This Course (Prerequisites)									
No.	Program Objectives	Target Abilities for Students							
①	e	Students will be able to identify the key components of a modern computer, and explain the function of each							
②	e	Students will be able to install and maintain operating systems.							
③	e	Students will be able to connect and configure devices.							
④	e	Students will be able to write basic algorithms and scripts.							
⑤	e	Students will be able to perform basic network configuration.							
⑥	e	Students will be able to explain and implement the fundamentals of computer and network security

Specific Achievement Criteria

Description of Ideal Achievement	Description of Standard Achievement
Understand how computer hardware and software work, the fundamentals of algorithms, and how to implement basic information security on a single computer and over a network.	Be able to explain how computer hardware works and write simple programs, as well as explain the difference between an encrypted connection and an unencrypted connection.

Course Schedule

* In the "Time" column of the Assignments, the standard time required for the specified assignment is provided. For total-time credit courses, please take the time corresponding to each class for review and preview. (For example, in the case of a 2-credit course, please try to take 200 minutes per week.) Please follow the teacher's guidance for details.

Class No. Date	Class Content	Method	Assignments (Preview and Review)	Time (Minutes)

2	ITO, Meguru		Hakusanorku C 101.201						
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	Data aggregation		Utilization of data is indispensable for realizing the smart society, Society 5.0, and it will be indispensable in the future to acquire a background in data science. In this lecture, you will learn the most basic methods of data analysis, which occupy a very large part of data science, 1) various methods of data aggregation, 2) normal distribution, 3) linear regression analysis through lectures and exercises.						
2	Normal distribution								
3	Correlation								
4	Linear regression								
5	MS Excel								
Course Description and Expectations for Students (10.5pt)									
In this course, you will learn the introductory contents of data analysis, which is important aspect of data science, through lectures and exercises. In addition to class lectures, the course also includes hands-on analysis exercises. The explanations of the mathematical background are kept to a minimum in order to understand the methods and practical exercises are carried out to analyze specific operation and tools.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks:									
Reference books: 完全独習統計学入門（ダイヤモンド社）ISBN 978-4478820094									
Excel による優しい統計解析（オーム社）ISBN 978-4-274-22612-0									
Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Basic operation and data literacy of Microsoft Excel									
No.	Program Objectives	Target Abilities for Students (9pt)

Field		Course Name		Credits	Course Code	Semester	Class Style		
Dept. S Specialized Required		Electric Foundations I		1	712400	First	Lecture Class		
Target Grade	Instructor		Office	E-mail Address			Office Hours		
2	HUSSIEN, Alaa		Hakusanroku C 101. 201				Tuesday 16:30-17:30		
Course Objectives									
Keywords (10.5pt)			Learning Objectives (10.5pt)						
1	DC circuits analysis.		Students will be able to analyze DC circuits using Ohm and Kirchhoff's laws, know the bridge circuits and their applications, learn about electromagnetic induction and the principles of DC motors and generators, study about condensers and inductors and their applications, understand the fundamentals of semiconductor devices such as diodes, transistors and the logic gates, learn about experiments for building simple electric circuits.						
2	Ohm and Kirchhoff's laws								
3	Wheatstone bridge- Electromagnetism								
4	Condensers-Inductors-AC electricity								
5	Diodes-Transistors-Logic gates								
Course Description and Expectations for Students (10.5pt)									
In this course, students will understand the meaning of some basic electrical terms and then learn about some basic laws and formulas such as Ohm and Kirchhoff's laws. They also learn how to use such formulas to gain the skill of analyzing different kinds of DC circuits including bridge circuits and their applications. One of the topics which students will know about is the electromagnetic induction and the principle operation of both electrical generators and motors. Condensers and inductors are useful electrical components and are used in most of the electrical appliances, so students will study their structure, properties, characteristics and their applications. Most of the students are a bit familiar of DC electricity but don't know about AC electricity so students will study an introduction to AC electricity. In the last part of this course, student learn about semiconductor devices such as diodes and transistors and then about logic gates. In some classes, students will watch demonstrations of doing some experiments to prove some formulas. It is advised that students pay full attention during the lecture, ask questions, and submit the assignments on time. The lecture style of this course is conducted through a discussion and Q&A between the teacher and students in order to get them involved in to the class. In addition, students help each other through peer learning during the work sheet solving time. These are two types of the active learning applied in the class.									
Required Materials (textbooks, reference books, reserved books) (10.5pt)									
Textbooks:									
Reference books:"Introduction to Electric Circuits" 9 th edition by Richard C. Dorf, James A. Svoboda, ISBN:9781118321829									
Reserved books:									
Knowledge/Skills Needed to Take This Course (Prerequisites) (10.5pt)									
Students should aware of the fundamental math calculations and know how to solve simultaneous equations. They should feel free to ask questions in and outside the class to understand the topics and solve the worksheet problems. In addition to that, students should realize that making mistakes is necessary for learning.									
No.	Program Objectives	Target Abilities for Students (9pt)							
①	g,h,i	Define and explain the electrical terms and basic principles of DC circuits connections including series parallel connections.							
②	d,h,i	Understand Ohm and Kirchhoff's laws and use their formulas to analyze different types of electric circuits.							
③	b,g,i	Learn about the electromagnetic induction and the principle operation of electric generators and motors.							
④	a,b,h	Discover more electrical components such as condensers and inductors and their applications in daily life.							
⑤	d,h,i	Know about semiconductor devices such as diodes and transistors and logic gates.							
⑥	a,d,h,	Learn how to make electric circuits using different components to do some experiments for measuring some quantities.

Evaluation Method

Evaluation Method	Target Ability		Evaluation Methods and Important Points (10.5pt)
Exams	①	✓	There will be one exam, the final exam which will cover material for latter half of this semester. It is worth 30% of your final grade. It is important to study all your notes, worksheets and quizzes before the test.
	②	✓	
	③	✓	
	④	✓	
	⑤	✓	
	⑥	✓	
Quizzes	①	✓	There will be one quiz each class which will cover materials from the previous lesson. The average of all your quizzes will be your final score which is worth 20% of your final grade. And there will be one mid-term test which will cover material for the former half of this semester. It is worth 30% of your grade, so 50% of your final grade will be obtained through these quizzes and mid-term test.
	②	✓	
	③	✓	
	④	✓	
	⑤	✓	
	⑥	✓	
Reports	①	✓	Every class the students are given a worksheet contains questions and problems to be solved at the class and complete it by the end learning session of the same day. The grading criteria will be based on whether or not you checked your answer and completed it. The homework equates 20% of the total score.
